

OrangeMech

Snack Food Production Equipment

ABOUT ORANGEMECH

OrangeMech is a food machinery intelligent solution provider that integrates production, sales, and services. It has the mission of "allowing intelligence to empower the food industry and making food production safely and efficiently", and condenses a team collective with strong energy. With the business philosophy of "ultimate professionalism, ultimate efficiency and ultimate services", it jointly promotes the intelligent upgrade of food industrialization with customers in many countries and regions around the world.

It is committed to promoting the equipment automation and digital process in food industrial fields such as fruit and vegetable processing, nut processing, pastry processing, food packaging, and central kitchen. With reliable products and enthusiastic services, it has won wide praise from customers worldwide.

Based on the long-standing corporate philosophy and belief, the people of OrangeMech are practicing its values to achieve broader goals.

OrangeMech insists on putting customers at the center, insisting on technological innovation, and insisting on sustainable development.

We are striving to make contributions to improving human food safety and dietary happiness and moving forward continuously towards the vision of becoming a globally respected and trusted enterprise.

Intelligent Solution Provider of Food Processing and Packaging

MISSION

Empower the food industry with digitalization,
Make food production safely and efficiently.
Assist customers in attaining greater success.

VISION

Contribute to the improvement of human
food safety and dietary happiness, and
become a globally respected and trusted
enterprise.

VALUE

With right mindfulness and altruism, and
without cease in progress, we strive for
excellence and make a positive impact on the
world.

French Fries And Chips Fully Automatic Production Line

This production line is a new type of French fries and potato chips production line independently developed and manufactured by our company with international standards. This production line is made of high-quality 304 stainless steel and controlled by PLC electrical appliances. It has high technical content, safety and high efficiency. The bearings are all imported stainless steel bearings, and the electrical appliances are imported brand-name products. The technical level is leading in China.

Model	OR-FCA-150	OR-FCA-1000
Capacity	100-150Kg/h	260-300Kg/h
Total Power	278KW	388KW

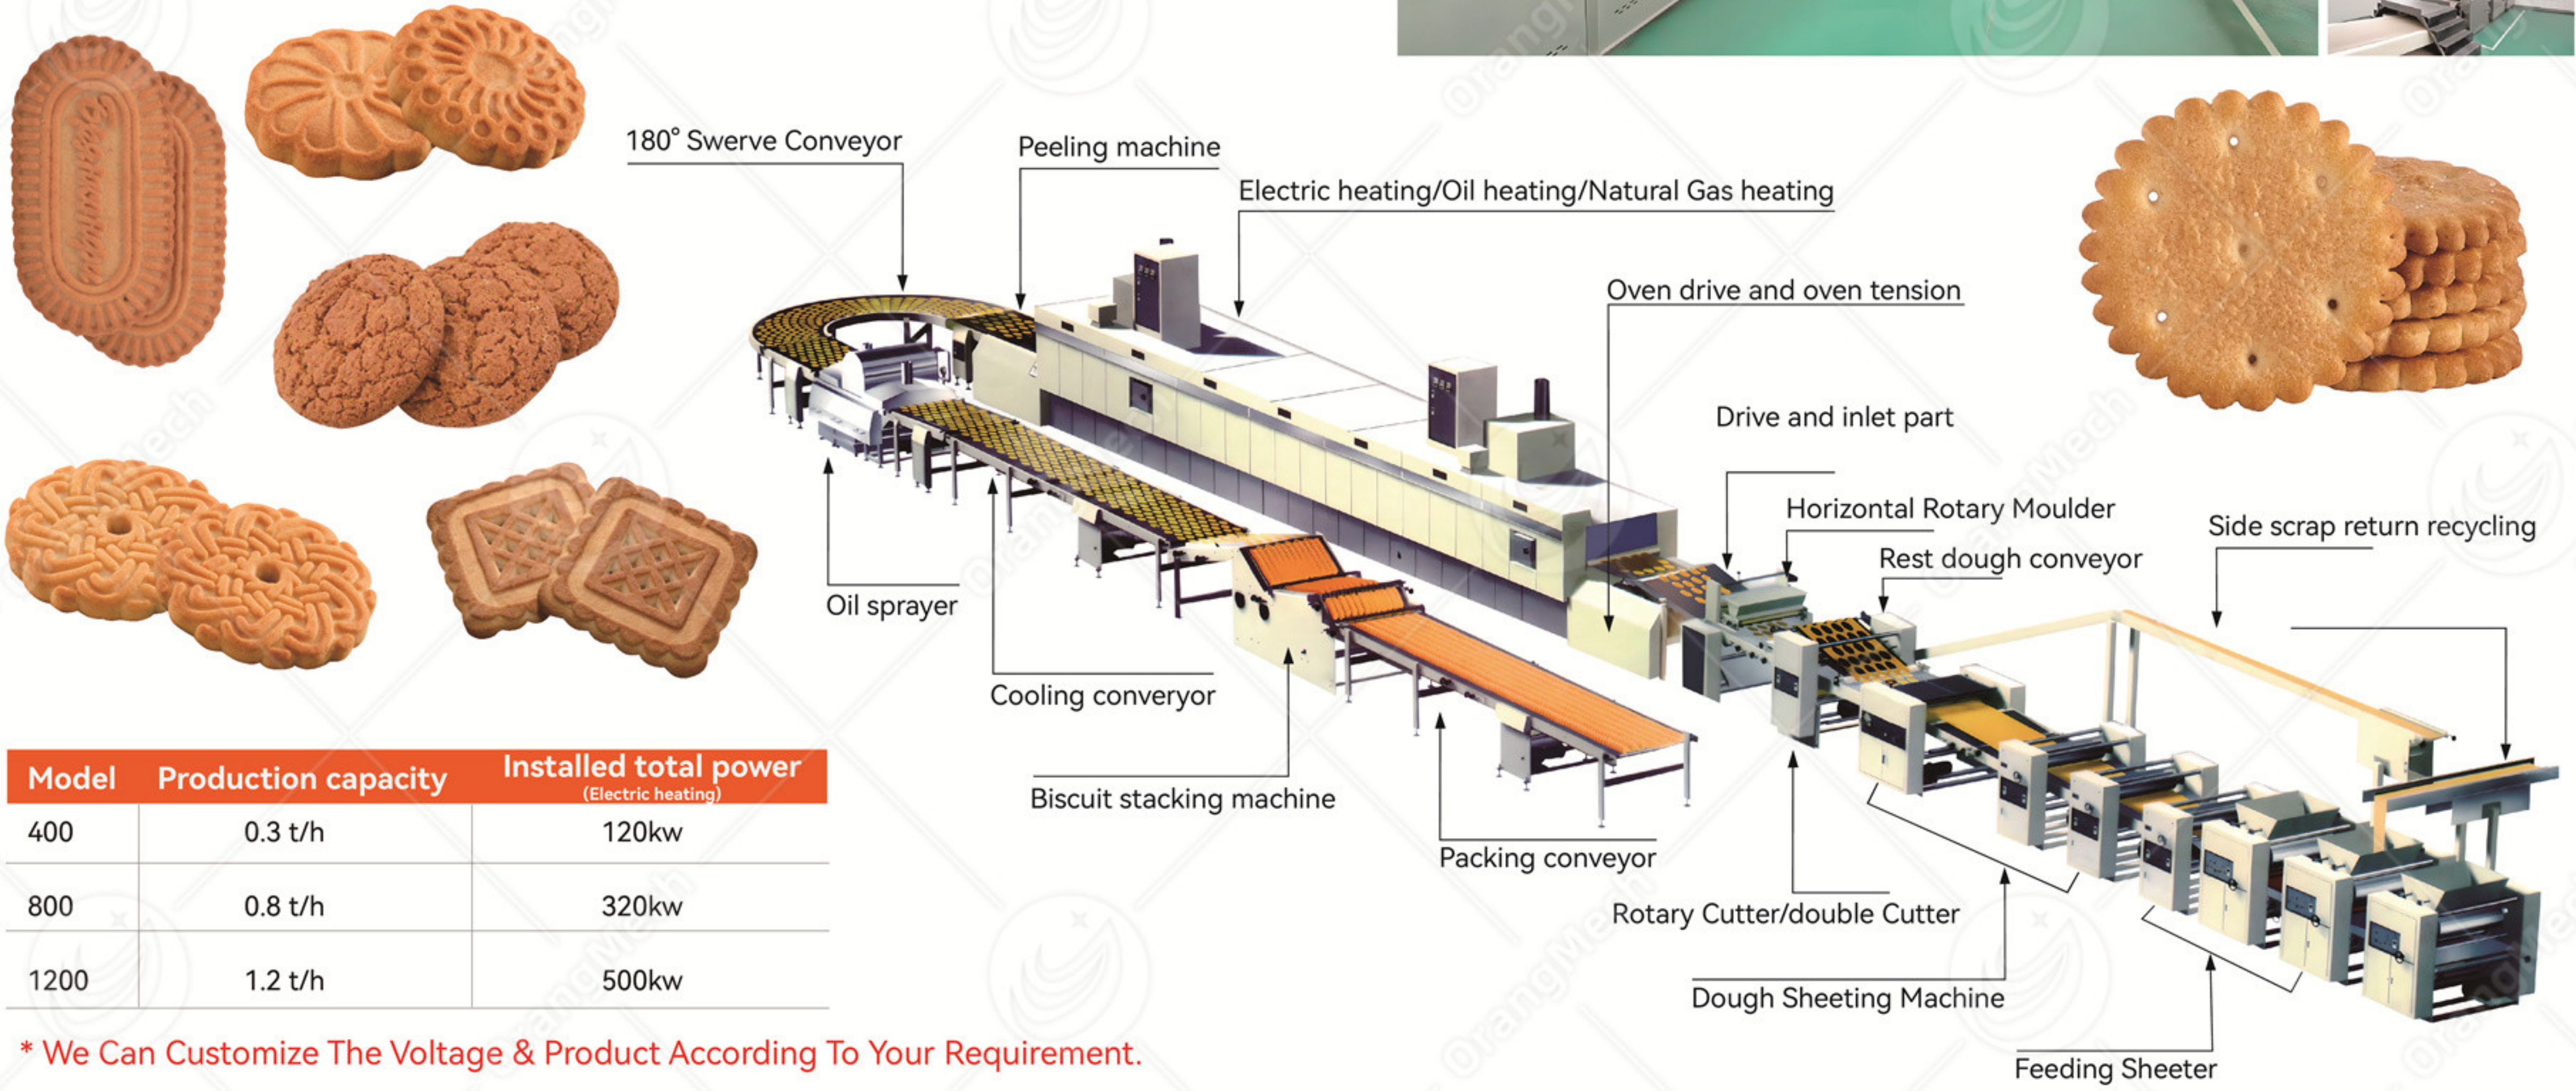

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Automatic Hard and Soft Biscuit Production Line

To achieve an ideal effect, the production line can make various products' combination according to users' special requirements such as factory's layout and biscuit's style, shape.

Characteristics: adopts imported electrical components, frequency control of speed, efficient energy-saving, either single or combined controlment.

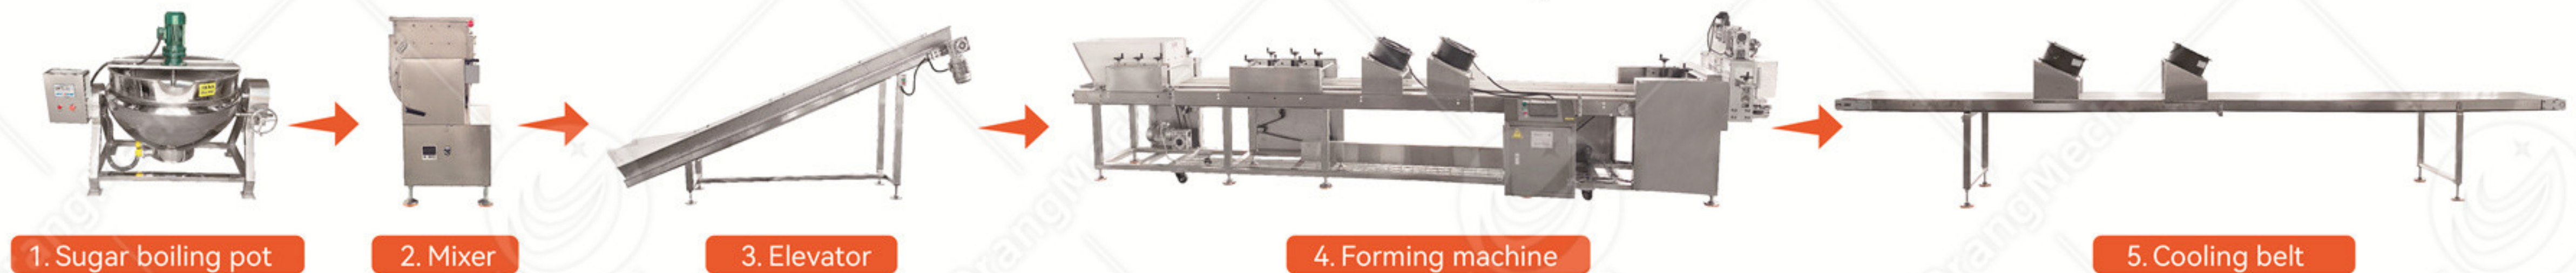

Model	Production capacity	Installed total power (Electric heating)
400	0.3 t/h	120kw
800	0.8 t/h	320kw
1200	1.2 t/h	500kw

* We Can Customize The Voltage & Product According To Your Requirement.

Cereal Bars Production Line

The cereal bar production line is a set of equipment combinations and process flows specifically designed for producing cereal bars, including raw material processing and shaping, baking and packaging, etc., to achieve large-scale and efficient production.

It is mainly used for the food processing and molding produced in medium and large food industry, such as Satsuma, Rice candy, Rice bar, Frozen rice candy, Sesame snack candy bar, Peanut brittle (peanut candy bar), Sunflower seeds candy bar, Coarse grains, Cereal bar, and other molding and cutting.

Model	Production capacity	Installed total power (Electric heating)
100	100Kg/h	19KW
400	200-400Kg/h	29KW
1000	600-1000Kg/h	45KW

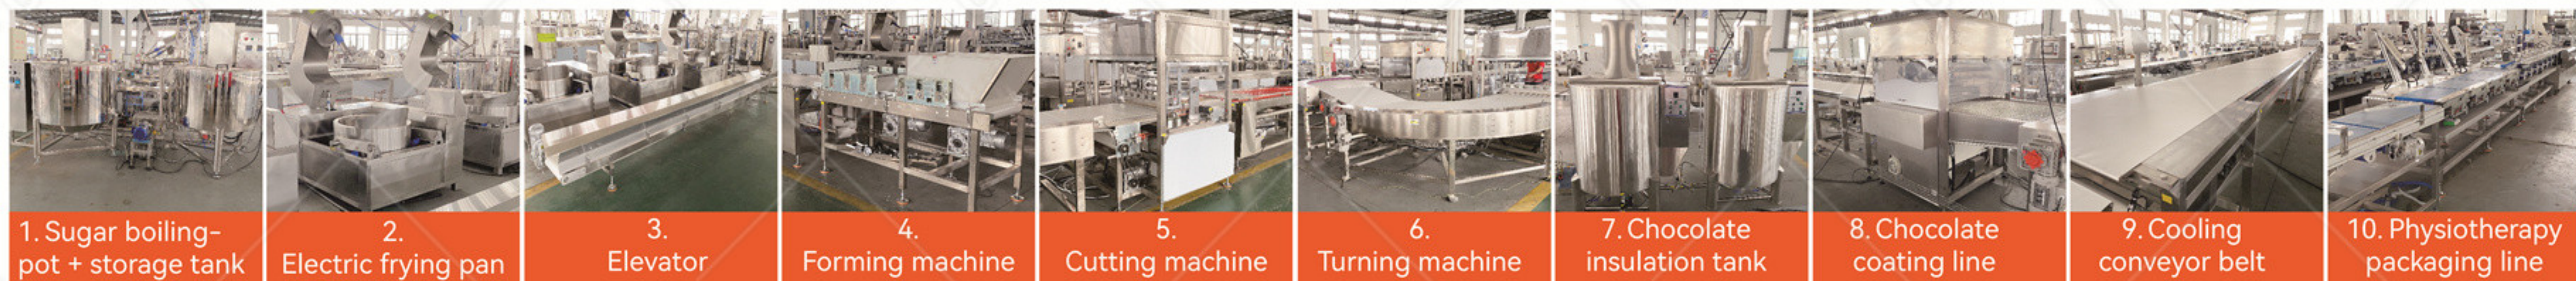

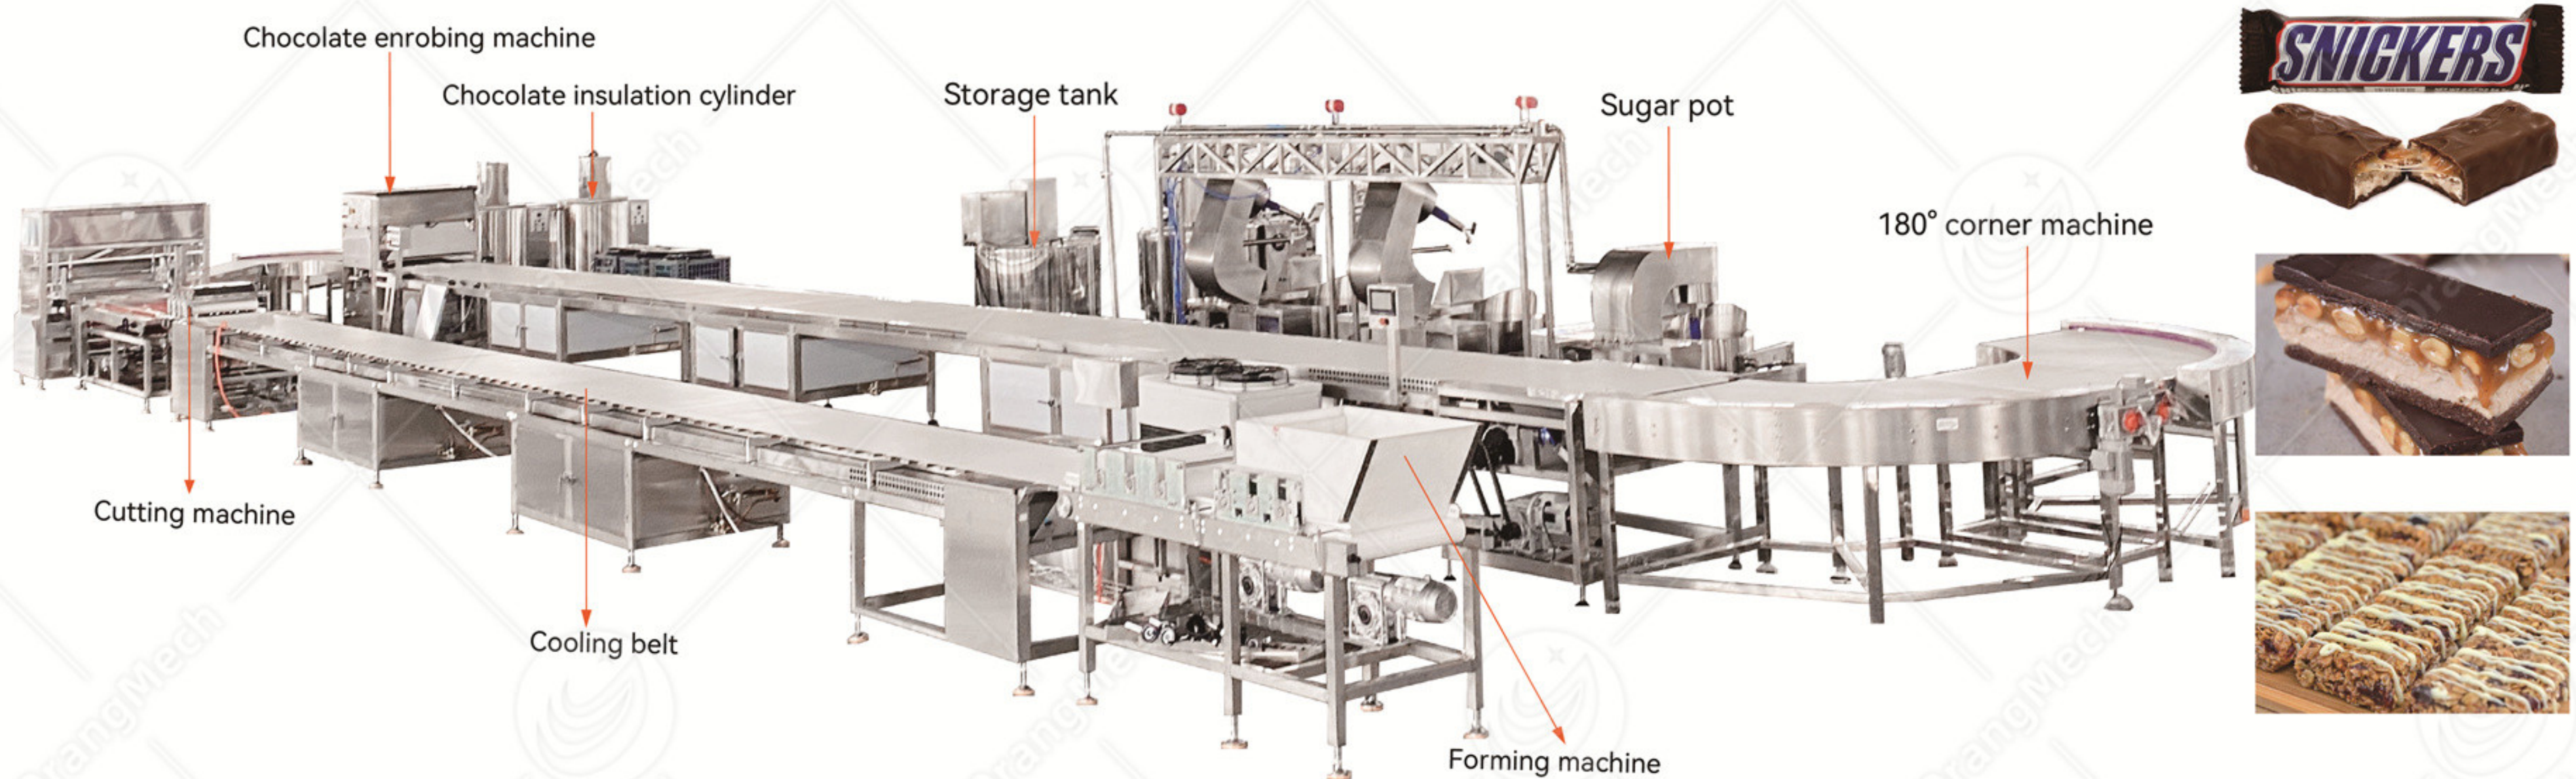

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Snickers/Cereal/Oat Chocolate Production Line

The Snickers production line is a set of equipment and process flows designed specifically for Snickers, including raw material processing, baking, processing and molding, chocolate coating, packaging, etc., to achieve large-scale and efficient production.

Model	Production capacity	Installed total power (Electric heating)
1000	800-1000 pcs/min	285KW

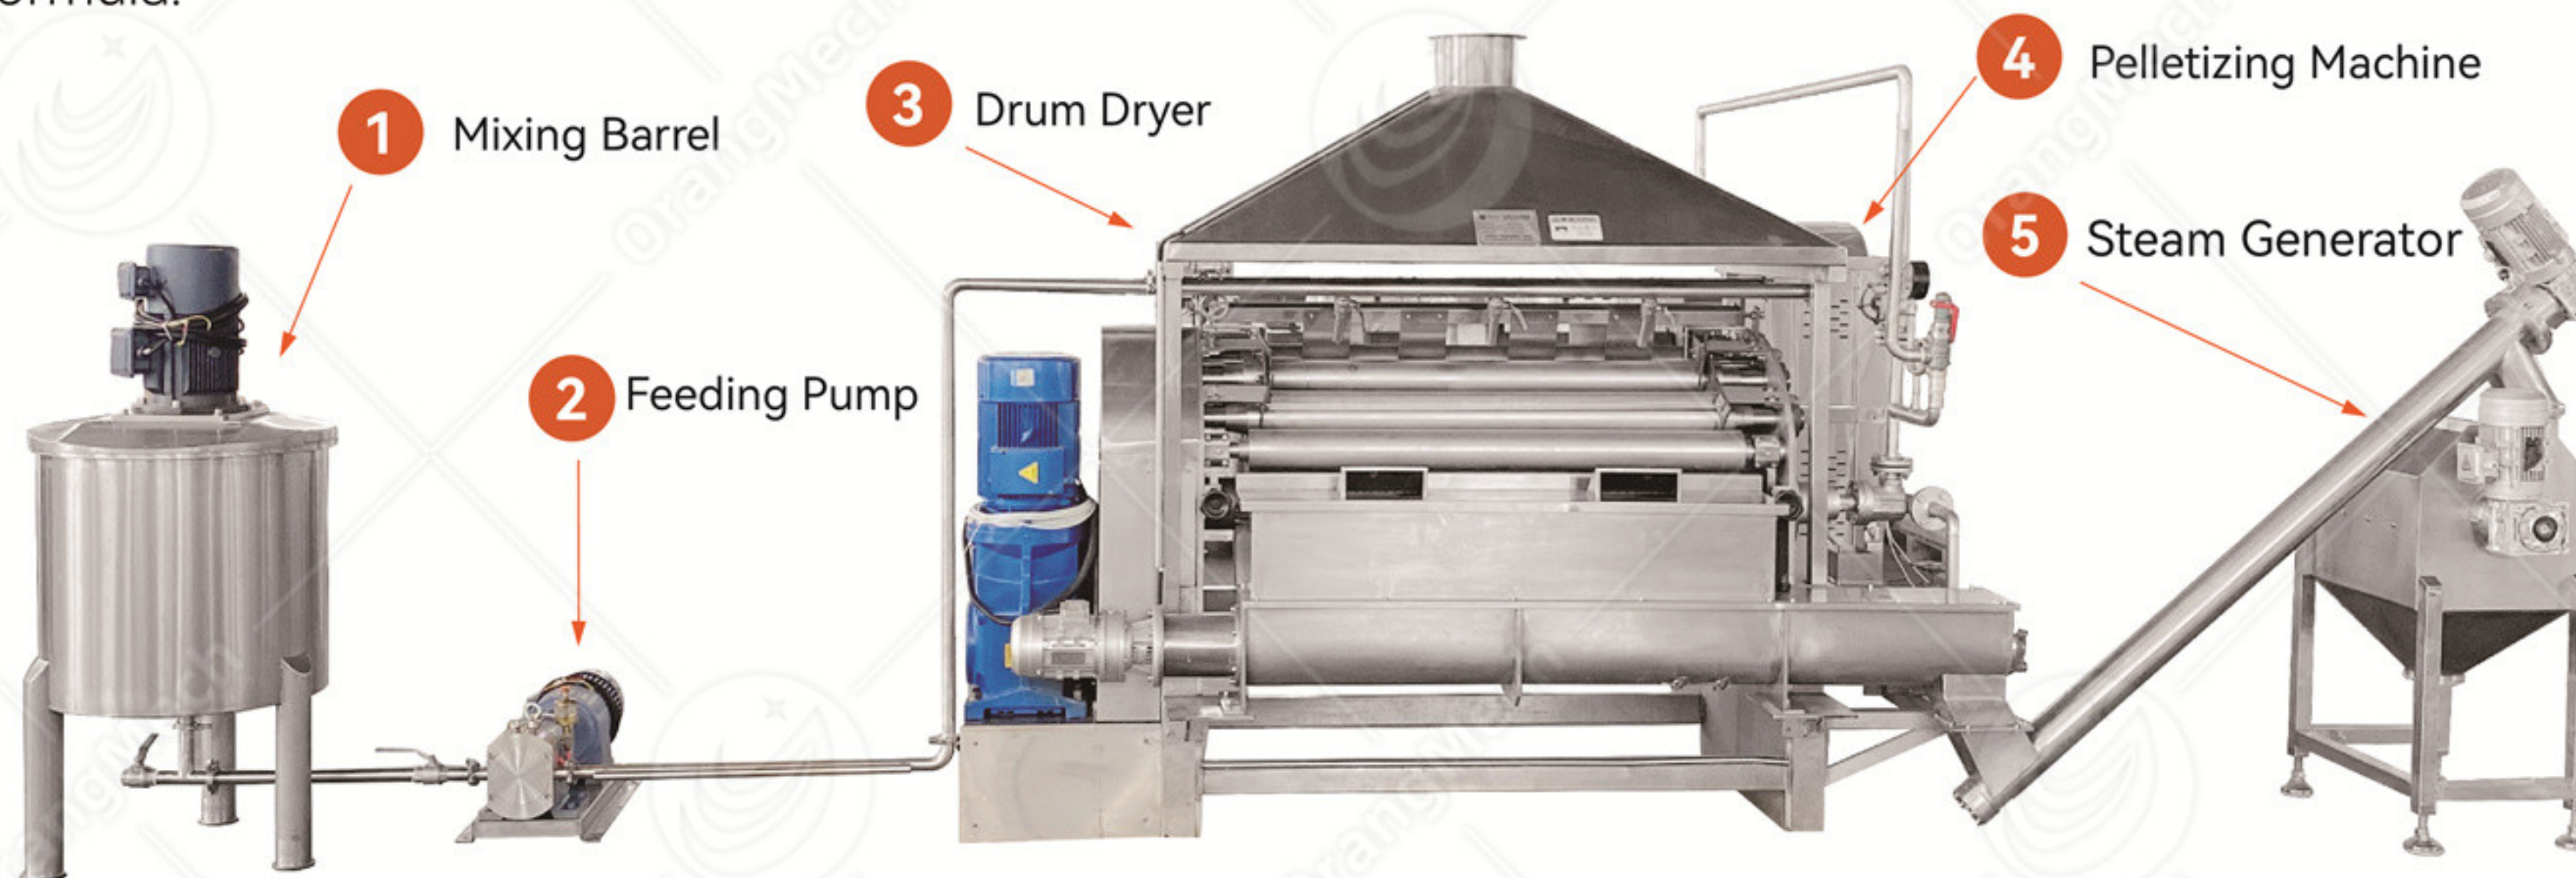

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Oatmeal / Rice Flour Production

The oatmeal (bar)/cereal production line adopts the most advanced production technology in China. It has the function of producing oatmeal or oatmeal bars through multiple processes of raw materials such as oatmeal powder and flour.

The whole set of equipment has a high degree of automation and good programming control effect; it can produce continuously and has high production efficiency; it has diversified production and can produce infant nutrition rice cereal, corn flakes, etc. by changing the formula.

Oatmeal bars need additional equipment

Model	Production capacity	Installed total power (Electric heating)
40	35-40Kg/h	11kw
200	160-200Kg/h	55kw

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Ice Cream Cone Making Machine

Full automatic ice cream cone production line to make ice cream sugar cone with high quality. This sugar cone production line can make sugar rolled cone, waffle cone and bowl-shaped waffle cup. We can design the different model of ice cream processing solution to make different types of sugar-rolled cones as required by clients.

Model	OR-ICM-500	OR-ICM-1000	OR-ICM-2000
Capacity	2500-3000Pcs/h	6000-7500Pcs/h	8000-9000Pcs/h
Total Power	3.37KW	3.37KW	3.37KW

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Fully Automatic Candy Production Line

The company supplies all kinds of automatic candy complete sets of equipment, integrating machine, electricity and gas control, with a reasonable and compact structure and a degree of automation. With high production efficiency, it can produce single-color, dual-flavor two-color spray, dual-flavor dual-color double-layer, three-flavor three-color spray, crystal candy, filling candy, striped candy, etc. The candy pouring production line has the characteristics of crystal clear and smooth, clear spray pattern, accurate and stable filling amount and position, and good taste. Our candy machine is welcomed by many customers from China and abroad.

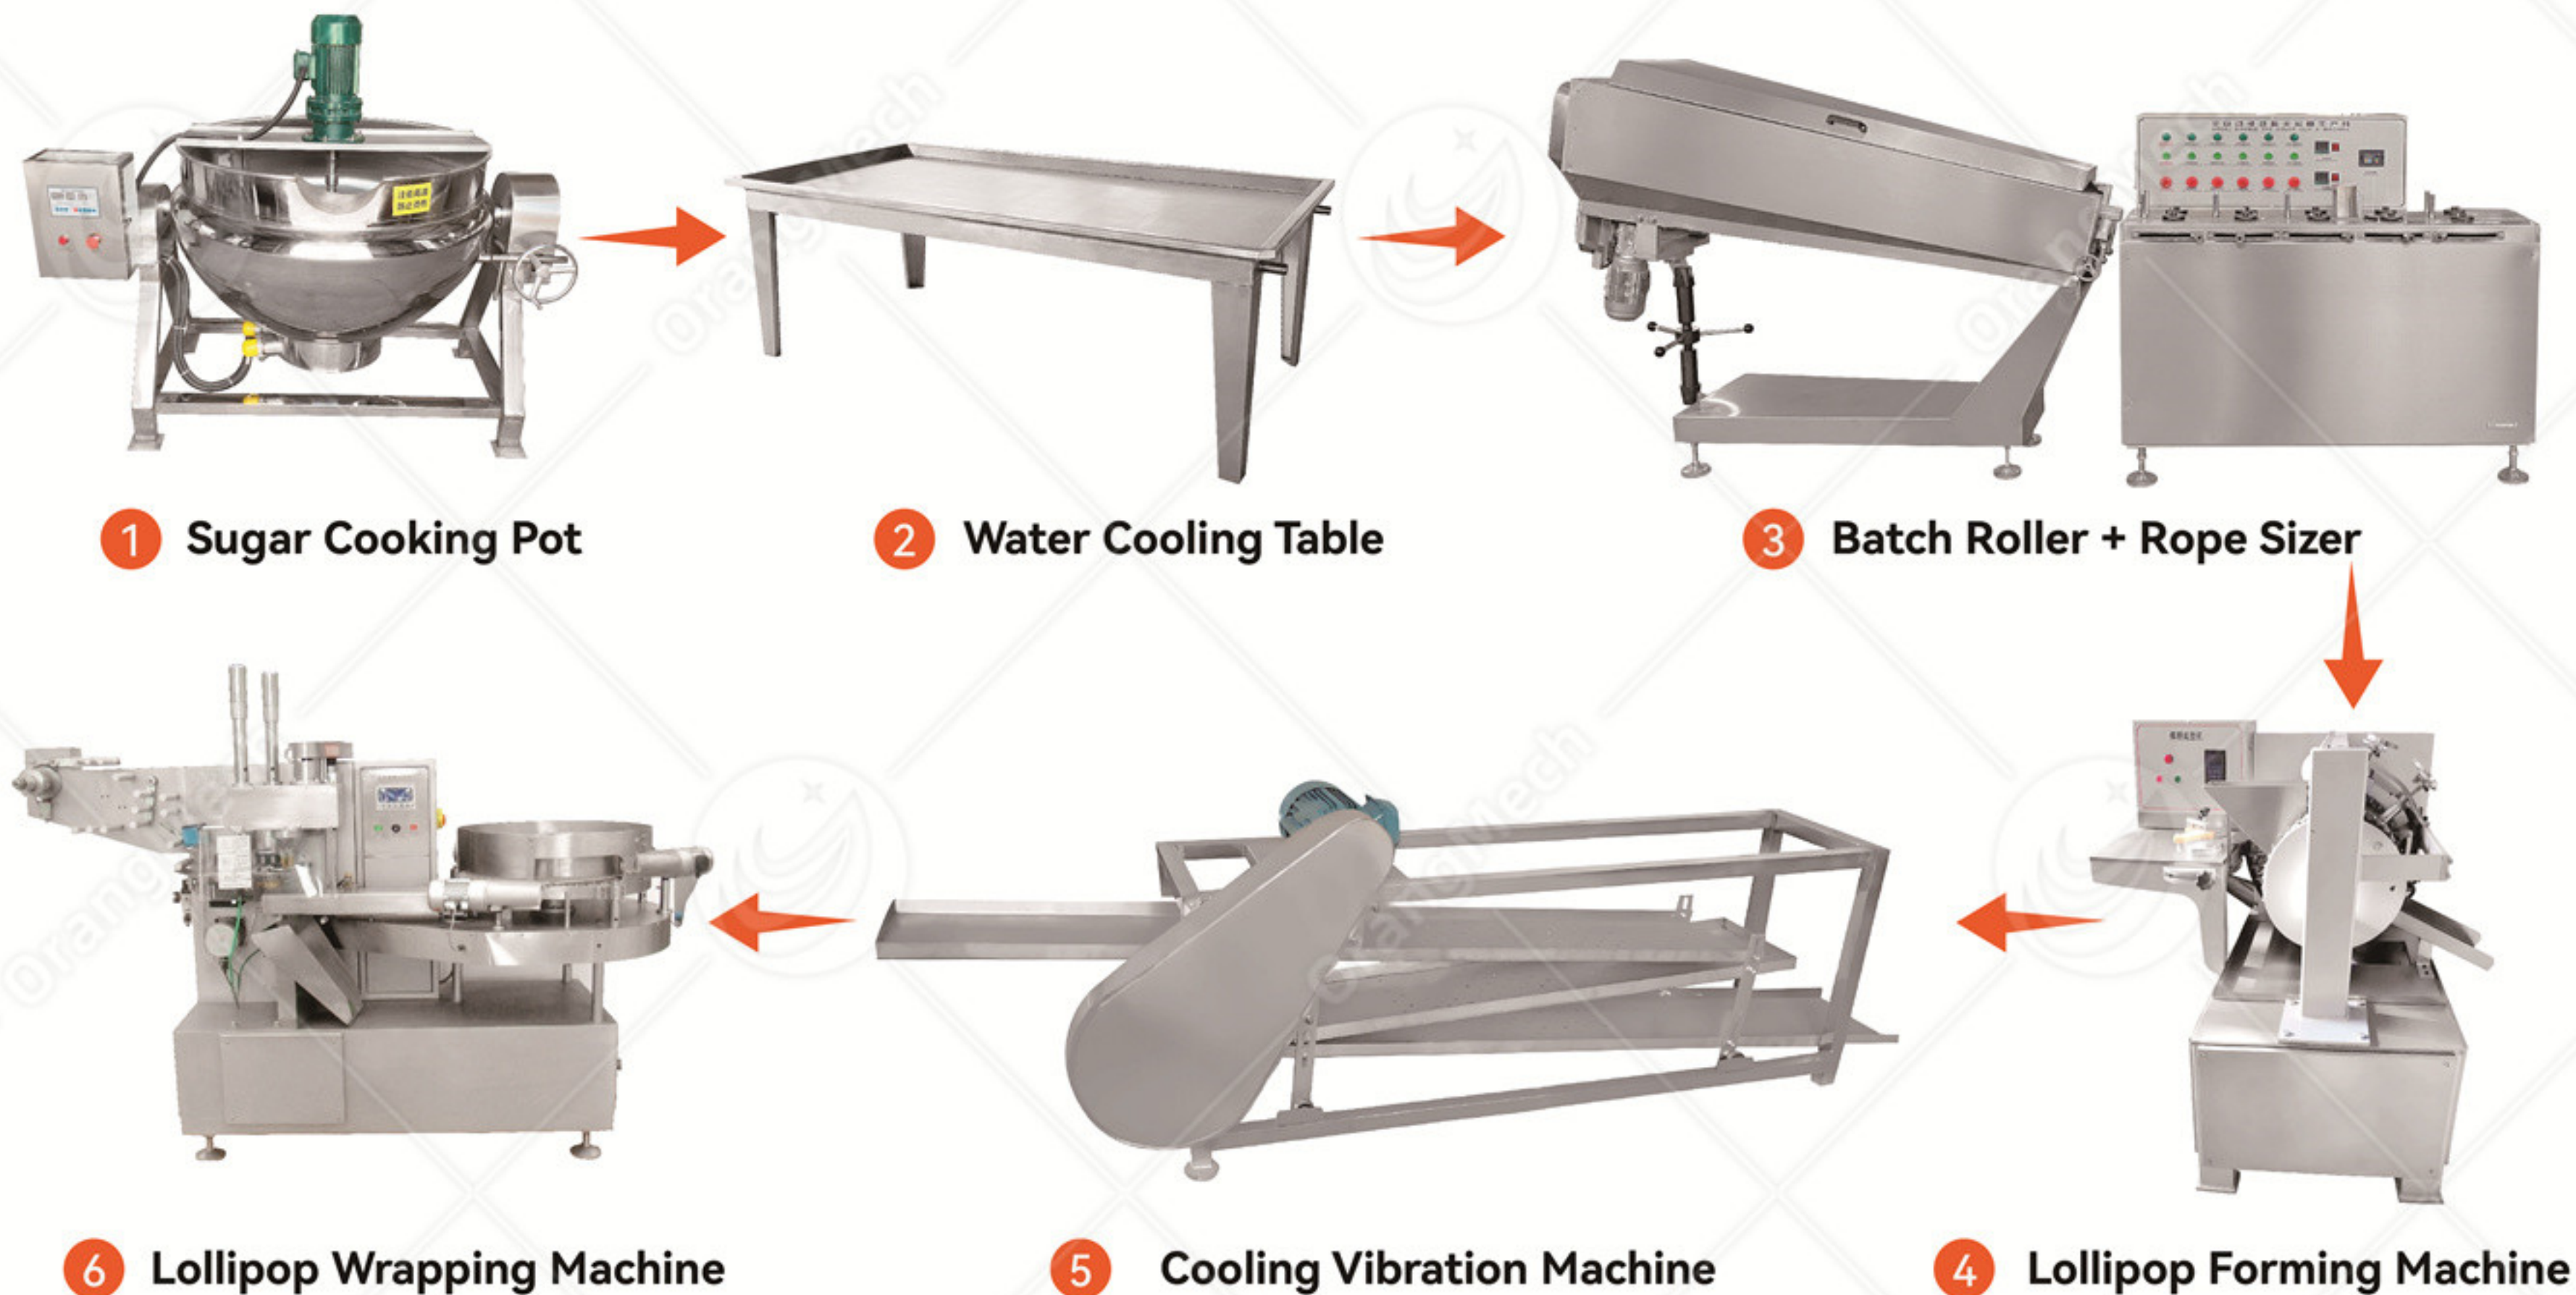

Model	OR-ACL150	OR-ACL300	OR-ACL450	OR-ACL600
Standard Output	150kg/h	300kg/h	450kg/h	600kg/h
Total Power(steam heating)	16kw	26kw	32kw	36kw

* We Can Customize The Voltage & Product According To Your Requirement.

Lollipop Forming Machine

The lollipop forming machine can be widely used for the production of various types of lollipops to improve production efficiency and quality stability, reduce workers' labor strength and reduce production costs. It can use or match other machine combinations alone to become a complete production line. It is an ideal product for investors in the candy industry.

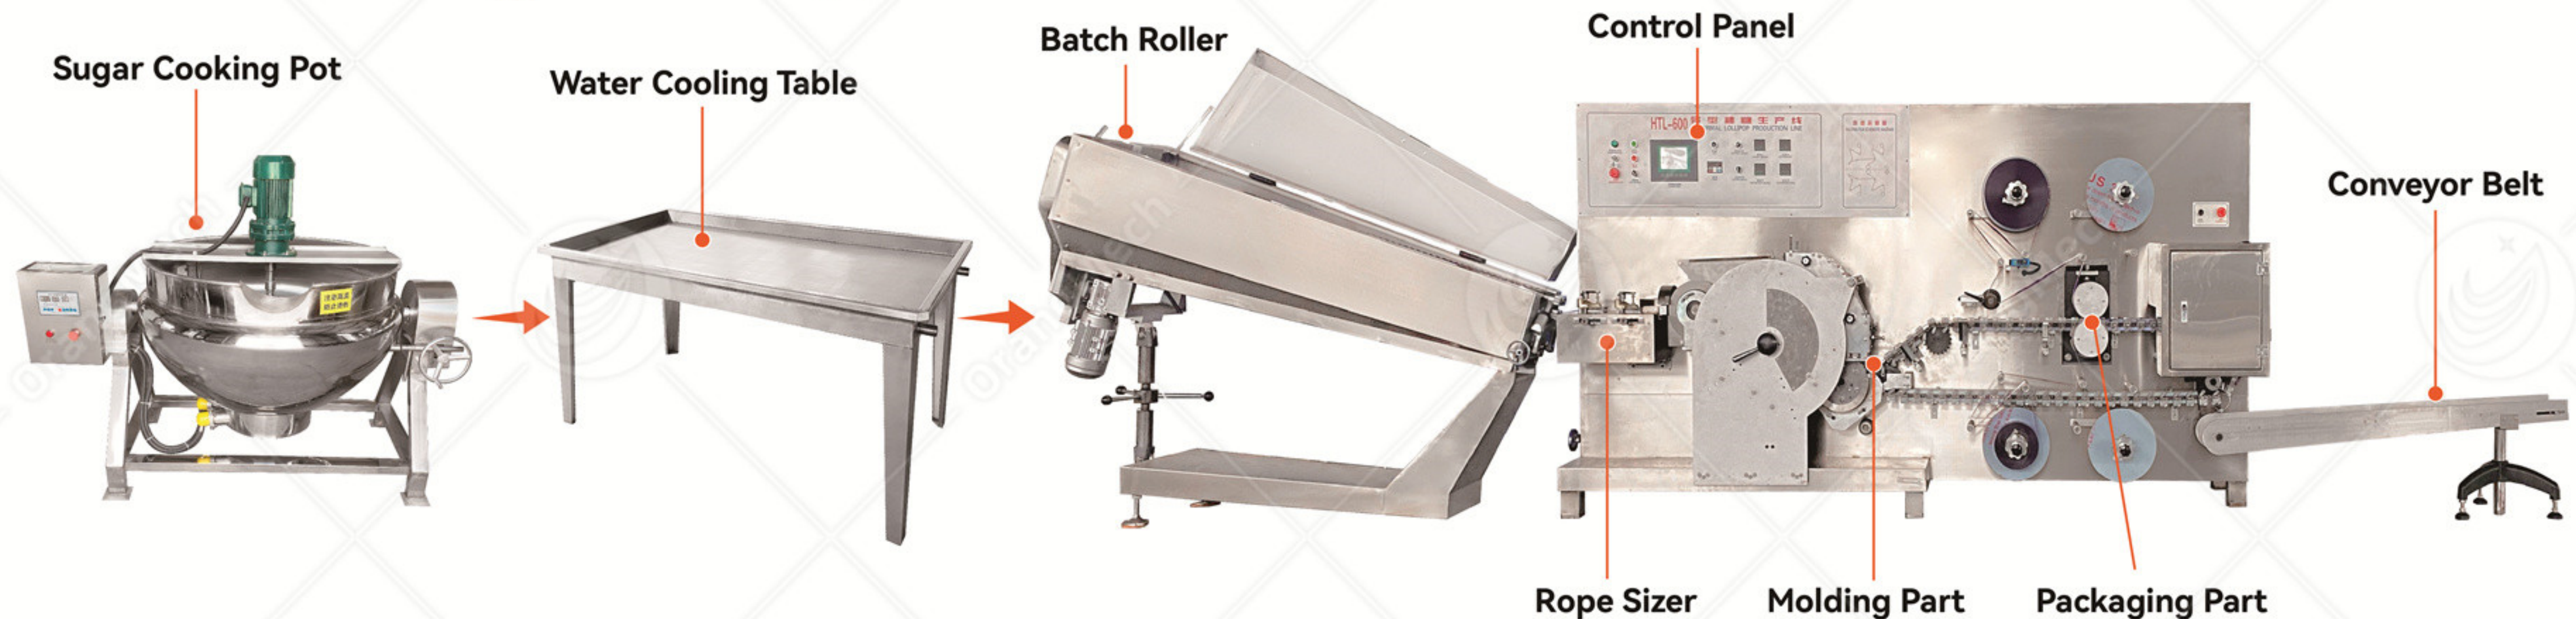

Model	OR-LFM-100	OR-LFM-200	OR-LFM-300
Capacity	100kg/h	200kg/h	300kg/h
Total Power	18kw	27kw	34kw

* We Can Customize The Voltage & Product According To Your Requirement.

Irregular Lollipop Candy Production Line

The special-shaped lollipop production line is mainly composed of the batch roller and the rop sizer forming and packaging integrated machine. Its working principle is that the colored and evenly kneaded sugar ball is placed in the batch roller, rolled and rubbed on the batch roller, and then further stretched by the rop sizer forming and packaging integrated machine's rop stretching mechanism, and then enters the forming mechanism for forming, and finally enters the packaging mechanism for packaging through a conveyor belt.

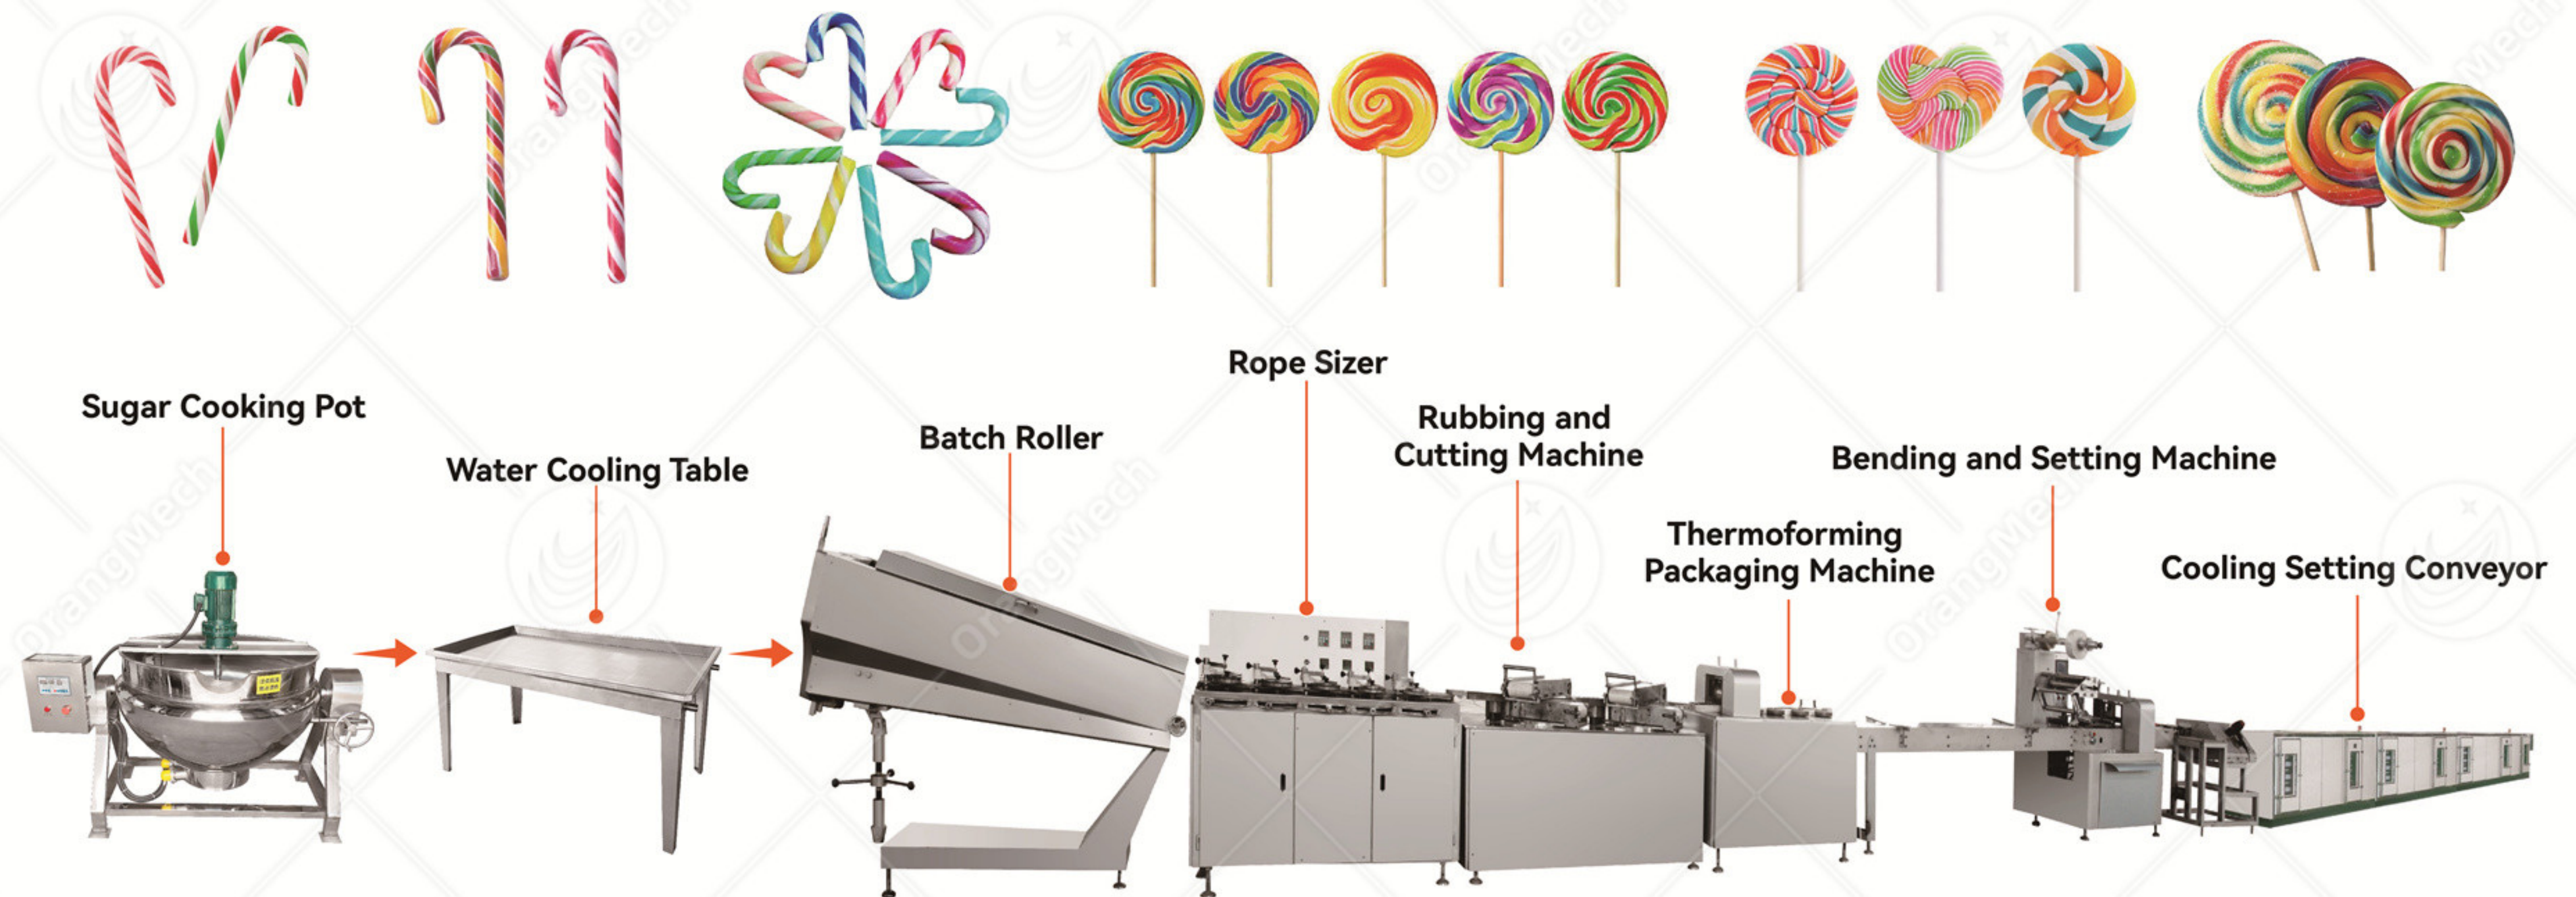

Model	OR-LFM-100	OR-LFM-200	OR-LFM-300
Capacity	100-120 pcs/min	200-240 pcs/min	320-350 pcs/min
Total Power		40kw	

* We Can Customize The Voltage & Product According To Your Requirement.

Candy Cane Production Line

The special-shaped lollipop production line is mainly composed of the batch roller and the rop sizer forming and packaging integrated machine. Its working principle is that the colored and evenly kneaded sugar ball is placed in the batch roller, rolled and rubbed on the batch roller, and then further stretched by the rop sizer forming and packaging integrated machine's rop stretching mechanism, and then enters the forming mechanism for forming, and finally enters the packaging mechanism for packaging through a conveyor belt.

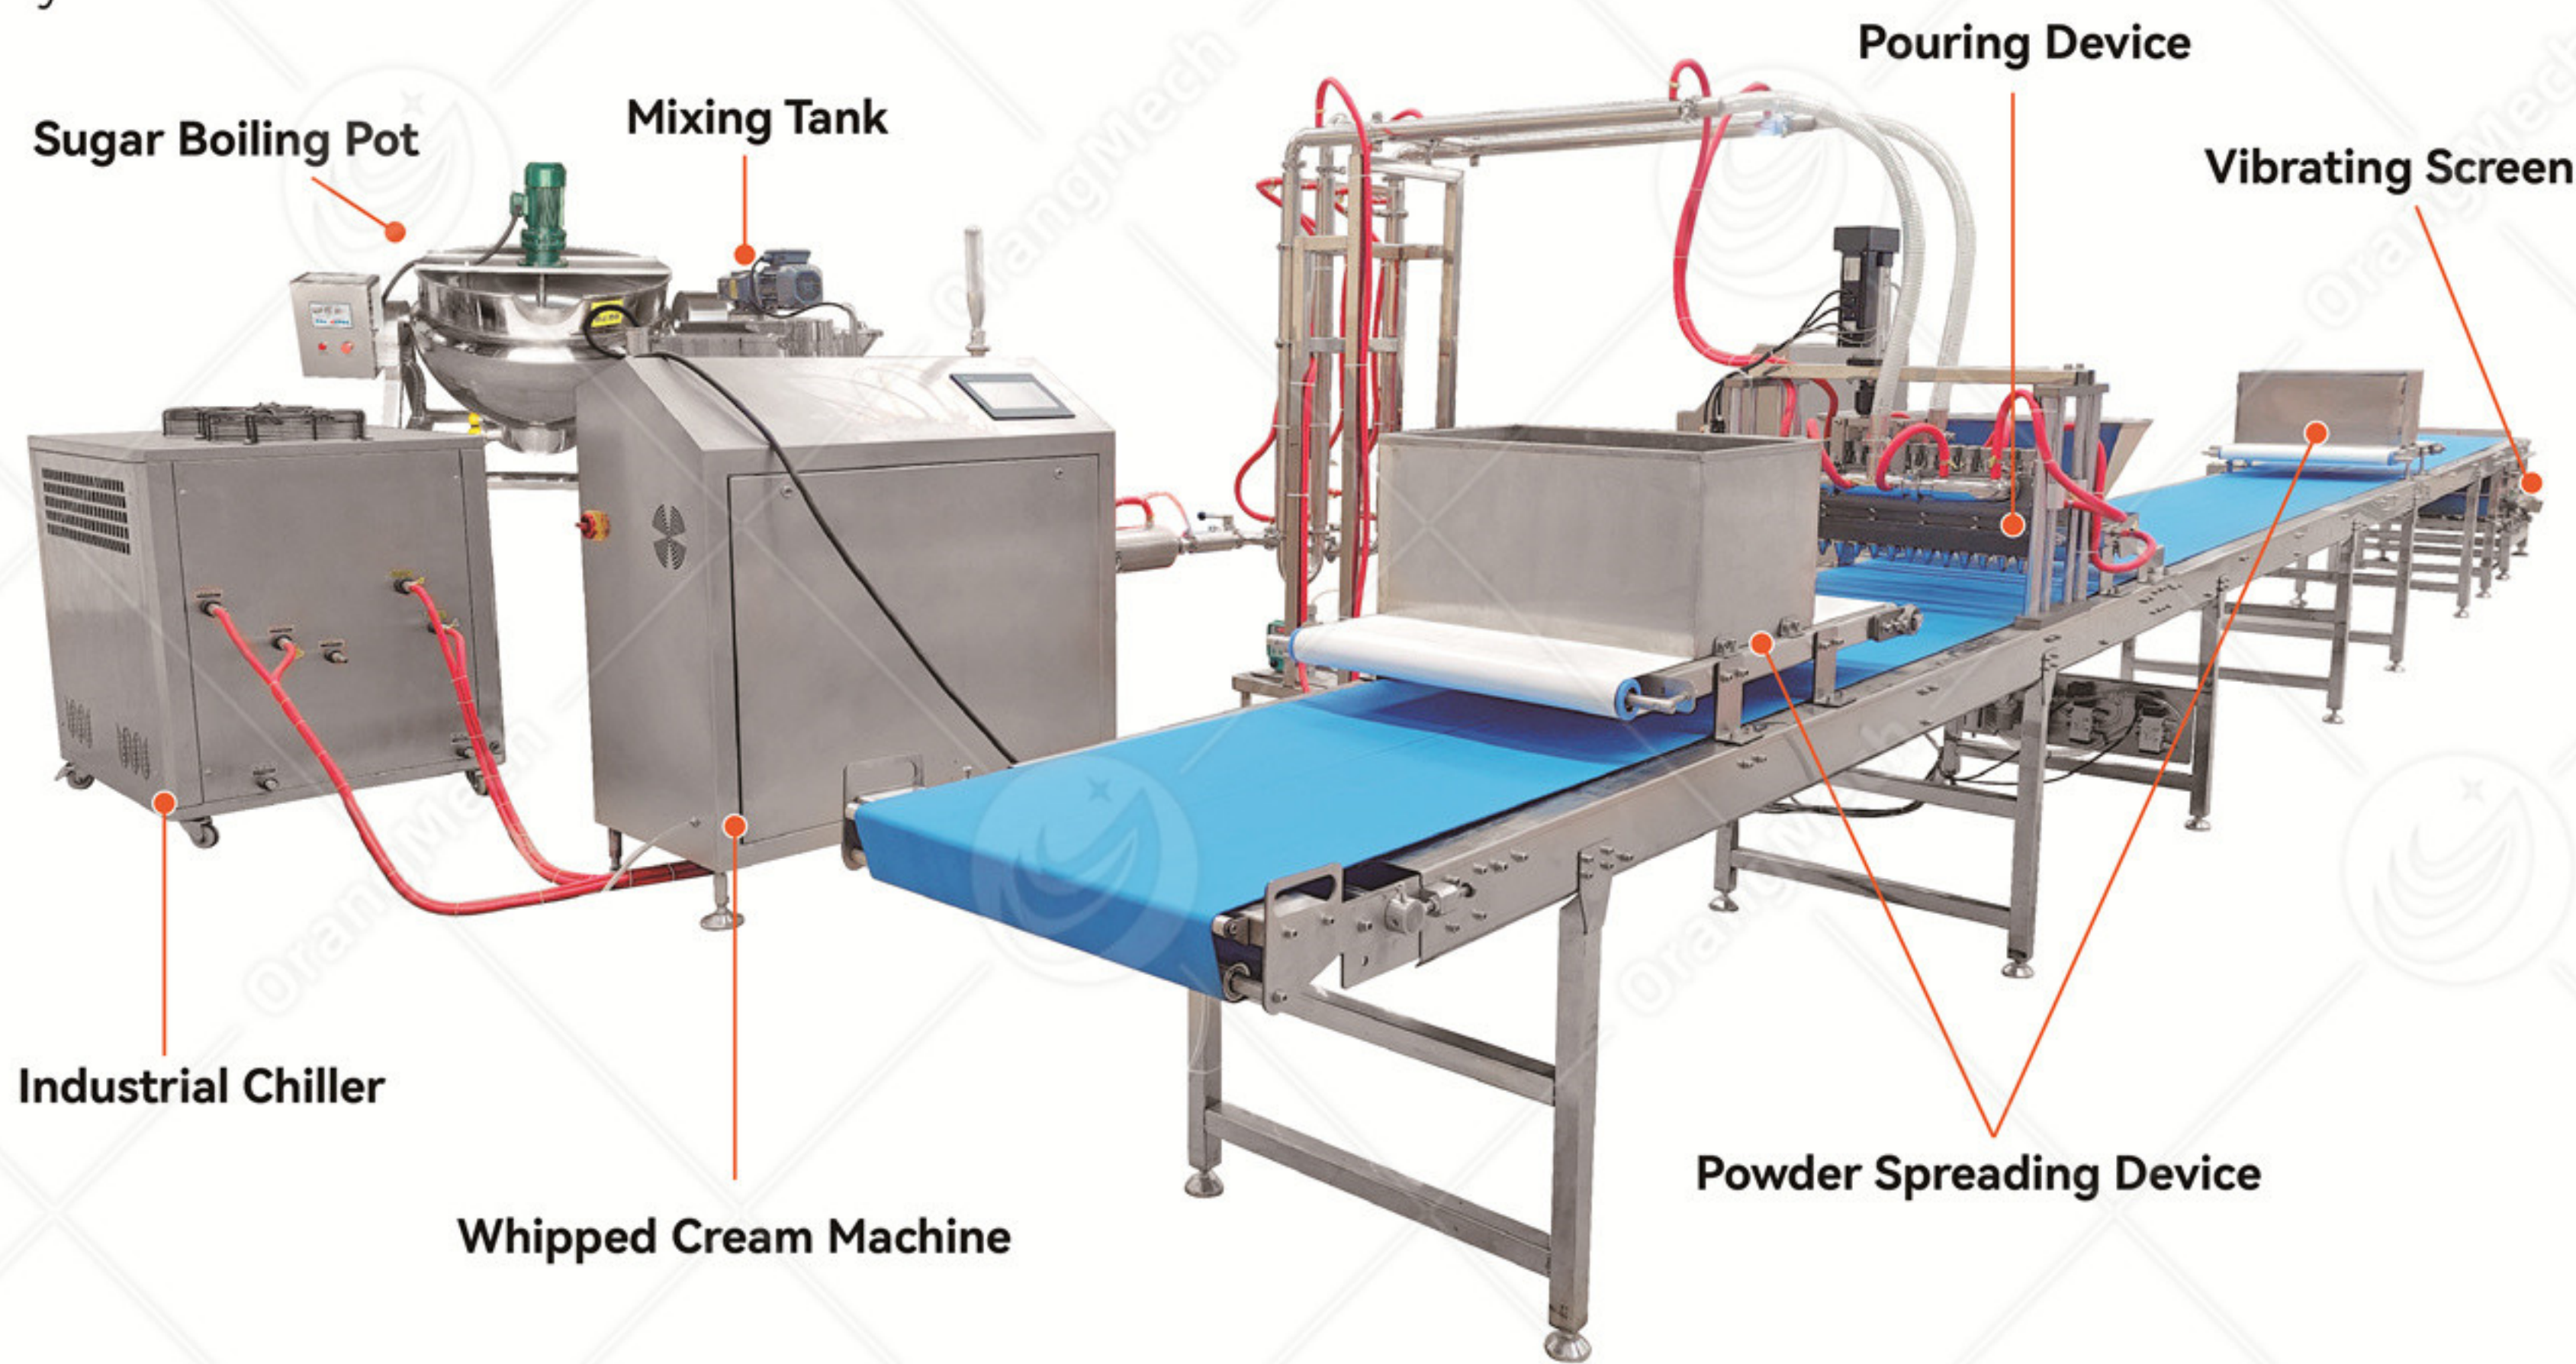

Model	OR-CCL-80		OR-CCL-120
Capacity	50-80 pcs/min		100-120 pcs/min
Total Power	35 KW		

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Automatic Marshmallow Production line

The fully automatic cotton candy inflatable stirring and beating machine starts from cooling and stirring to high-speed beating. The entire system consists of a pre mixing system, a beating system, a conveying system, a refrigeration system, and a control system. It can complete continuous high-speed beating of cotton candy or cake raw pulp in a short time, and automatically transport the beaten pulp to the forming machine through the automatic conveying system.

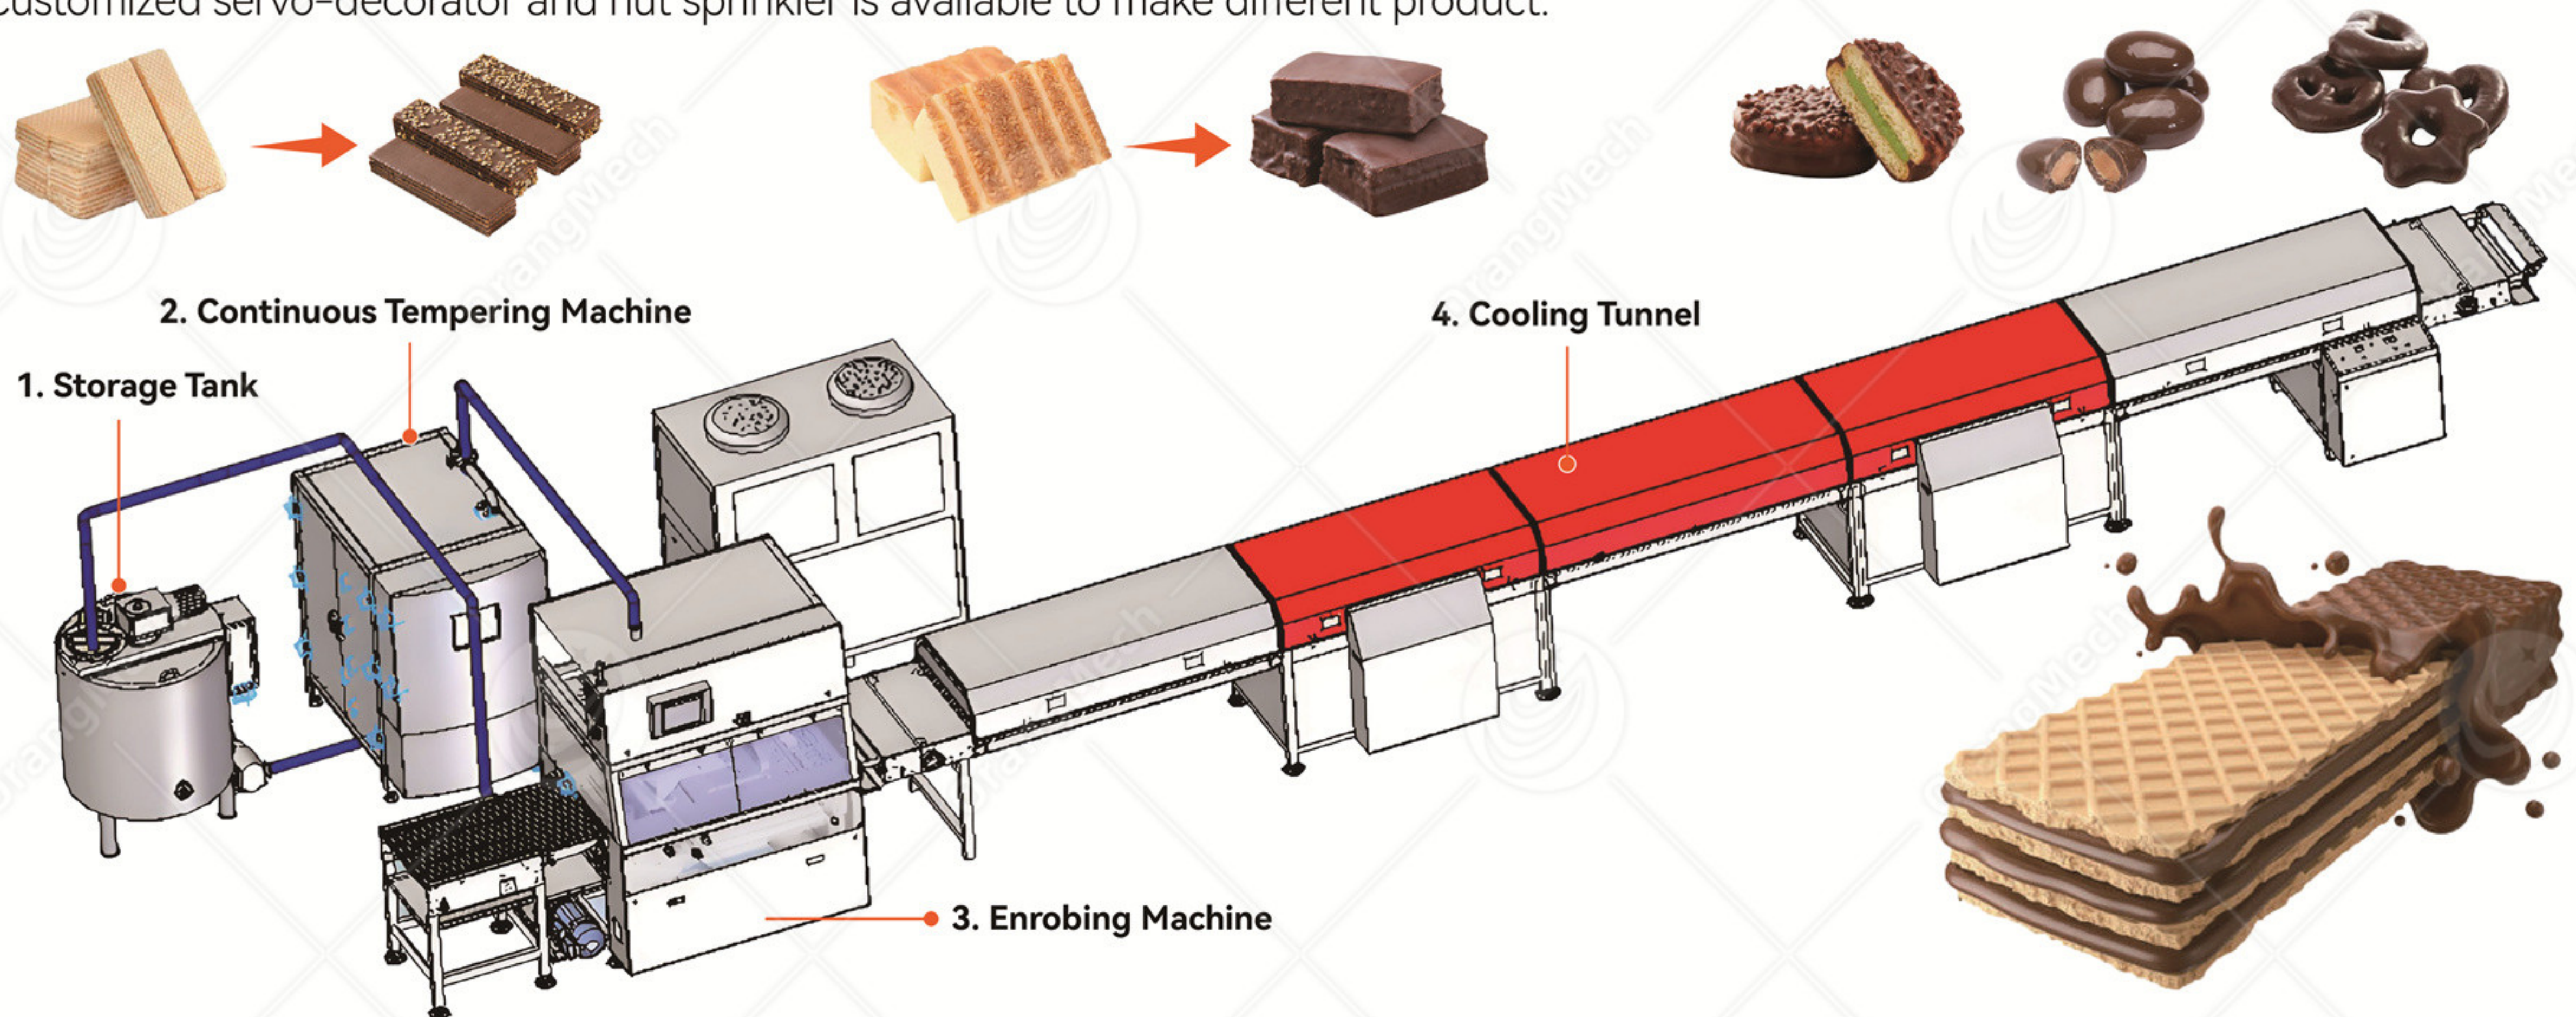

Model	OR-AML-150	OR-AML-300	OR-AML-500
Capacity	150kg/h	300kg/h	500kg/h
Total Power	27KW	40.2KW	56.5KW

* We Can Customize The Voltage & Product According To Your Requirement.

Chocolate Coating Cooling Line

The chocolate enrobing machine can coat chocolate on the surface of many kinds of foods, such as candy, cake, biscuit, wafers, egg rolls, fruit and snacks etc. It can coat chocolate on all sides of food or coat chocolate on bottom-side for your option. Customized servo-decorator and nut sprinkler is available to make different product.

Model	OR-CCL-300	OR-CCL-500
Capacity	300kg/h	500kg/h
Power	28KW	

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Yogurt Production Line

This set of equipment is a yogurt production line independently developed and produced by our company. We have capacity 200L/batch, 300L/batch, 500L/batch, 1000L/batch, 2000L/batch. It has the advantages of simple operation, easy installation, simple cleaning and high degree of automation. This set of equipment can use milk powder or pure milk as production raw materials, and different fermentation strains, flavoring agents and additives can be added according to customer process requirements.

Model	OR-YPL-100	OR-YPL-300	OR-YPL-500
Capacity	100L	300L	500L
Total Power	65.2KW	94.2KW	114.2KW

* We Can Customize The Voltage & Product According To Your Requirement.

Cheese Production Line

The cheese production line is a professional food processing equipment independently developed and produced by our company. The whole set of equipment covers a series of processes from raw milk processing to finished cheese production. This set of equipment has high production efficiency, adapts to production needs of different scales, is simple to operate and install, and has stable and reliable product quality. At the same time, it can produce a variety of cheese products to meet different market needs. According to your specific needs and production conditions, our professional team will design and install the most suitable cheese production line for you, helping customers achieve greater success in the field of food processing.

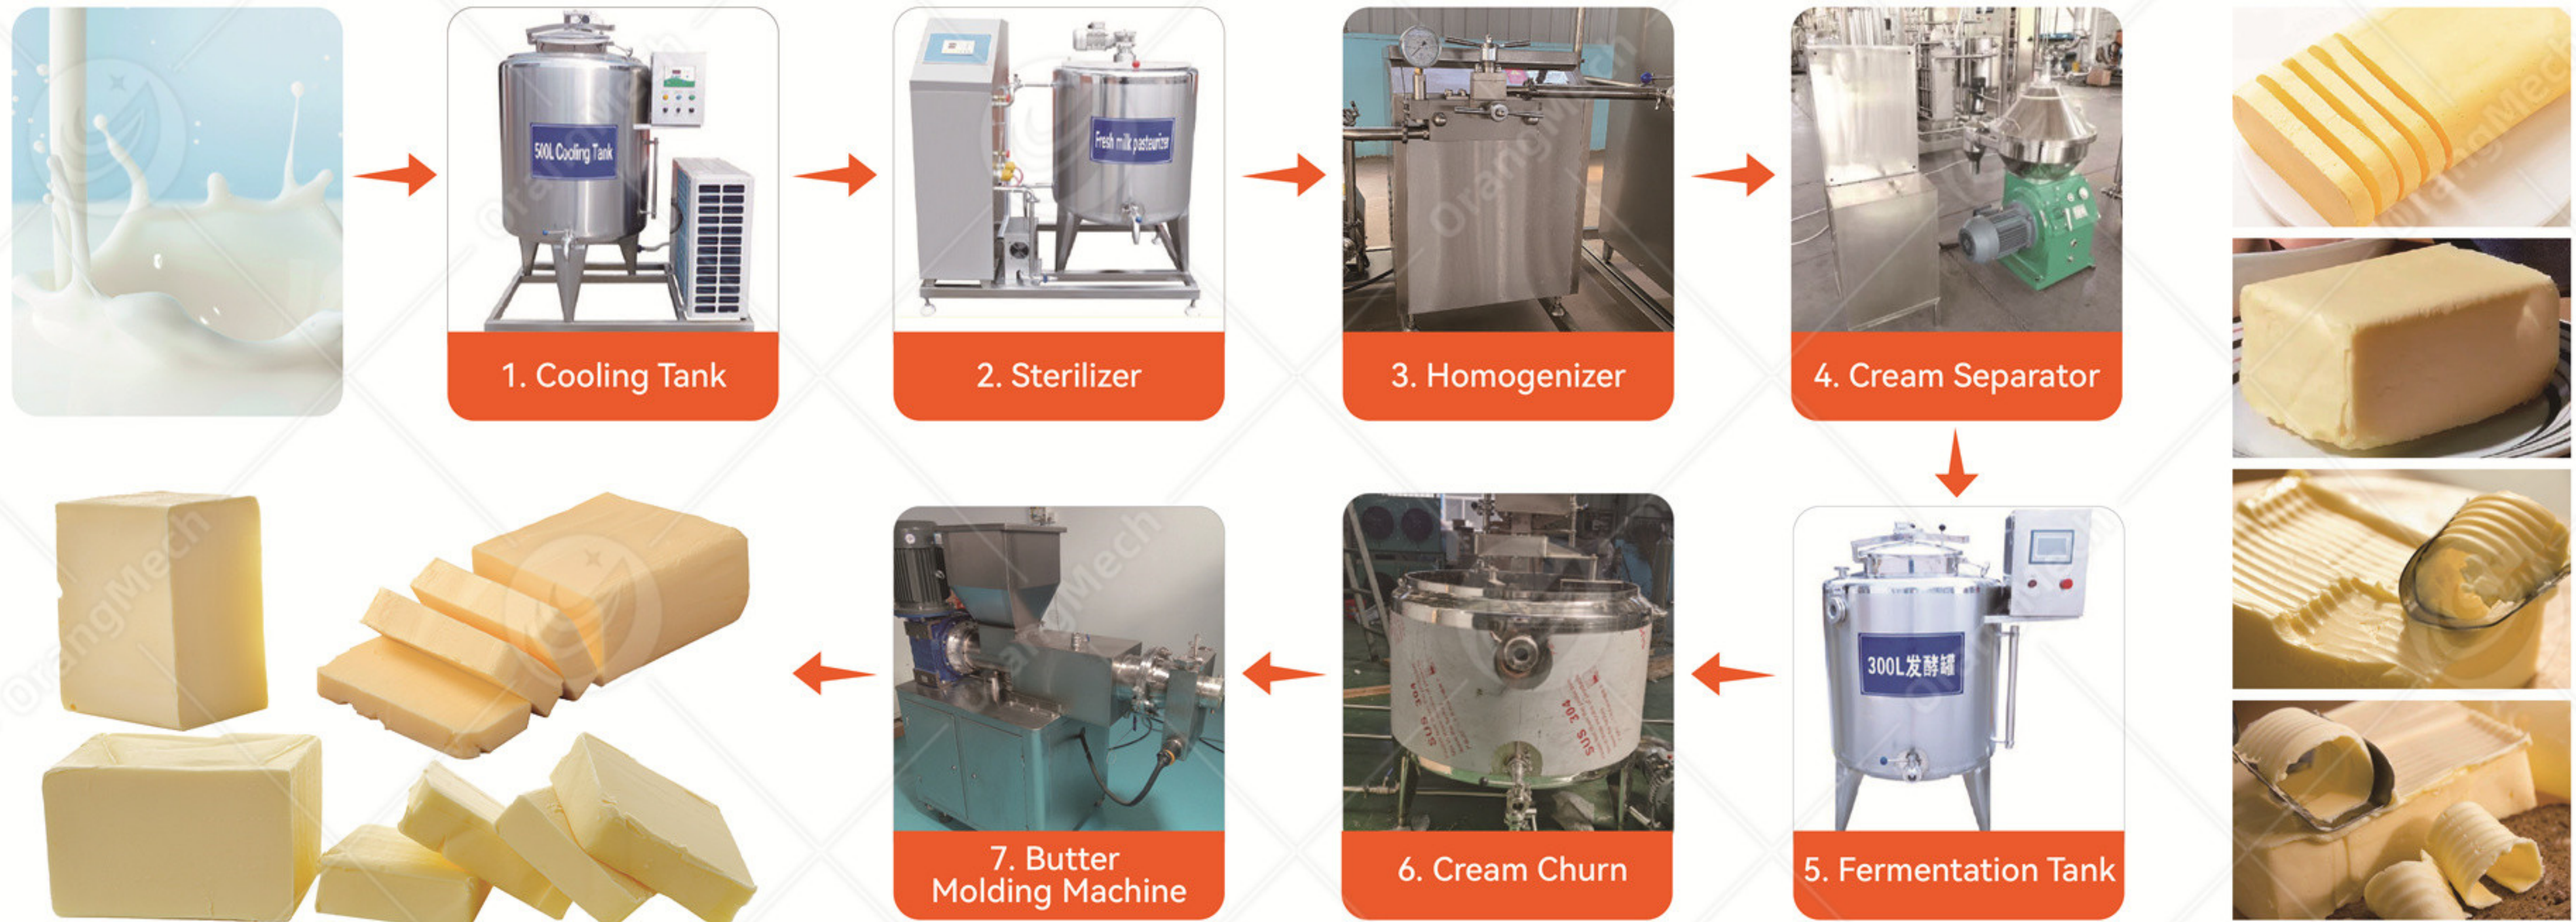

Model	OR-CPL-100	OR-CPL-120	OR-CPL-150
Capacity	100kg/time	120kg/time	150kg/time
Total Power	78kw	98kw	115kw

* We Can Customize The Voltage & Product According To Your Requirement.

Butter Production Line

The butter production line is used to extract butter from fresh milk. The cream obtained after centrifugal separation is stirred and pressed to make a dairy product called butter, also known as cream or butter oil. Butter is a light yellow solid at room temperature and has a unique milky aroma after being heated and melted.

Model	OR-BPL-100	OR-BPL-120	OR-BPL-150
Capacity	100kg/time	120kg/time	150kg/time
Total Power	78kw	98kw	115kw

* We Can Customize The Voltage & Product According To Your Requirement.

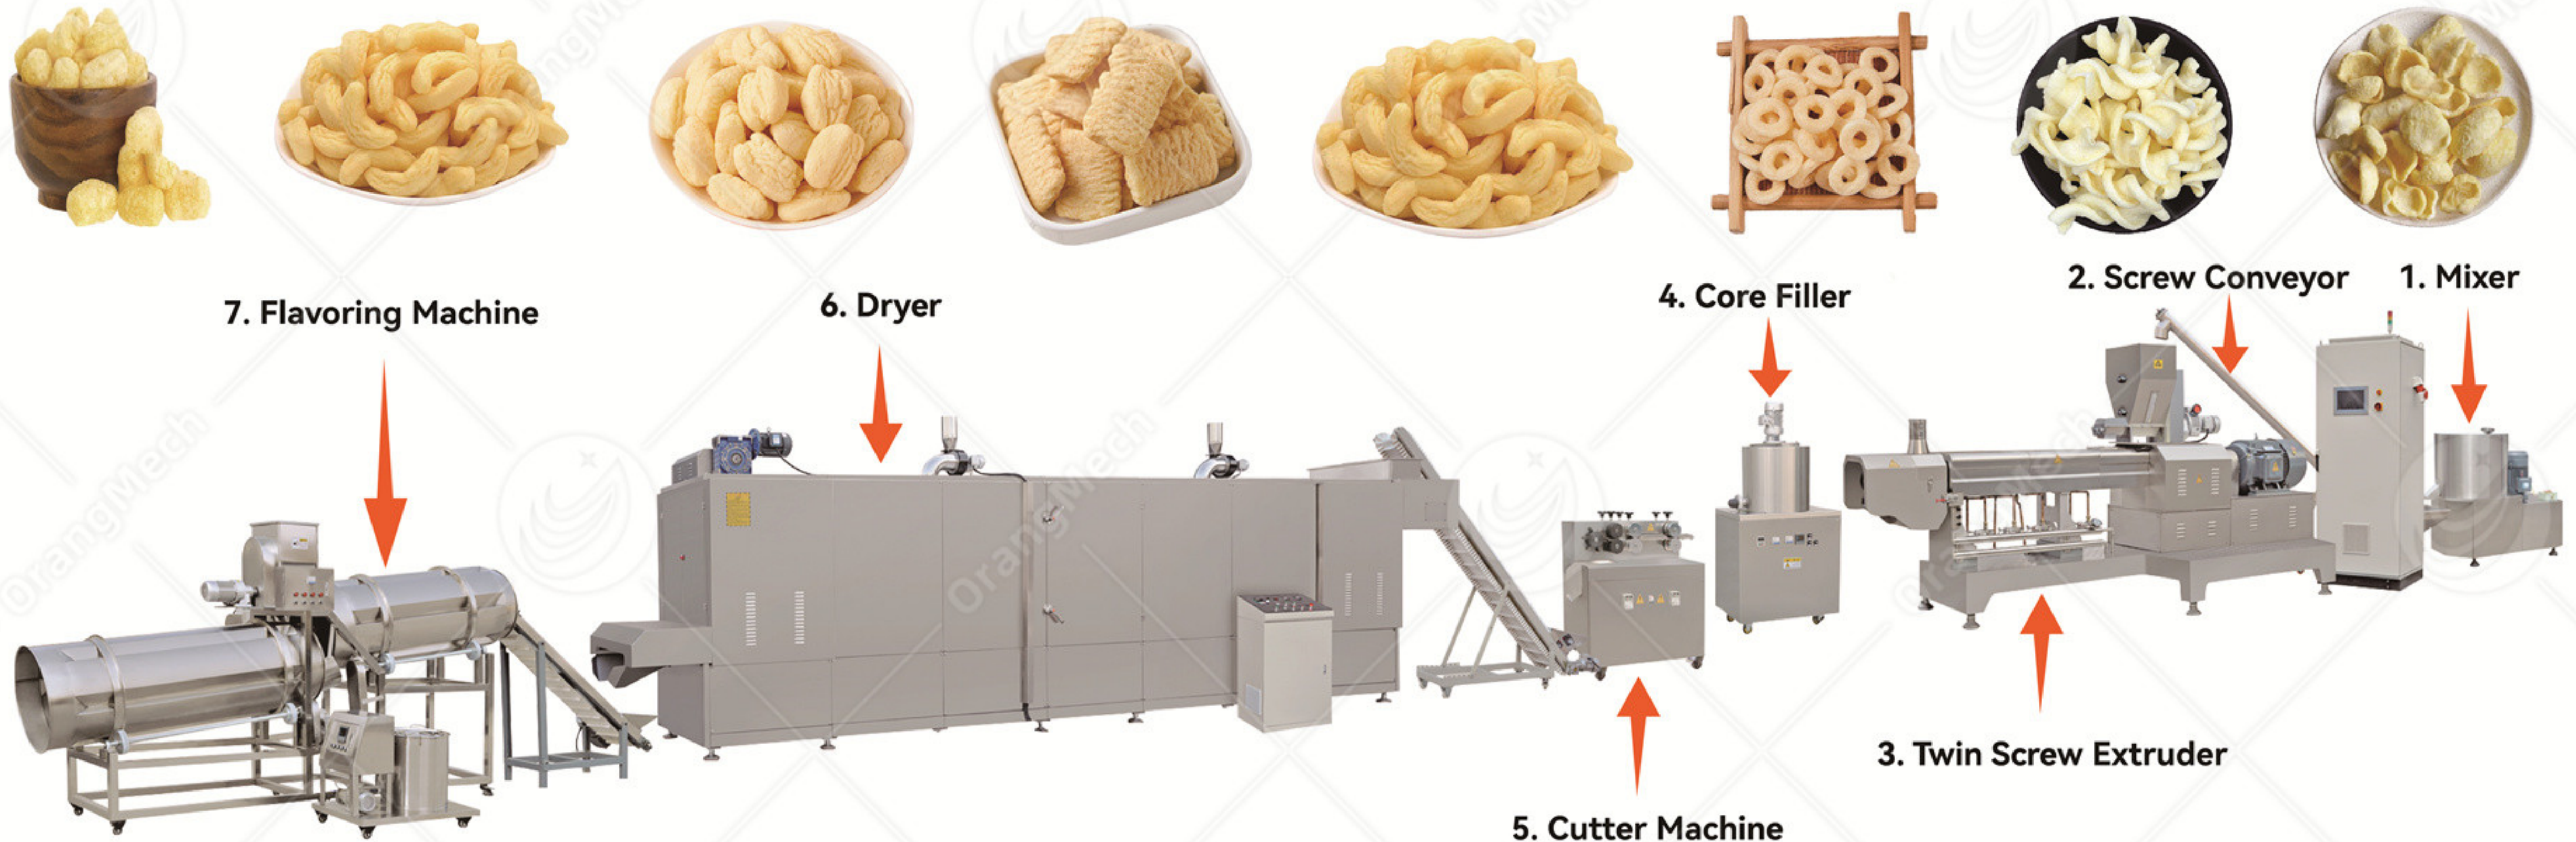

Professional manufacturer of food processing equipment

Puffed Snack Production Line

This set of equipment is a puffed snack production line independently developed and produced by our company, and we have capacity 100-150kg/h, 200-260kg/h, 500-600kg/h, 1000kg/h.

It has the advantages of simple operation, compact structure, diversified products, easy installation and high degree of automation.

This set of equipment uses corn flour as the production raw material and makes fried or baked extruded foods of different shapes and flavors according to customer needs.

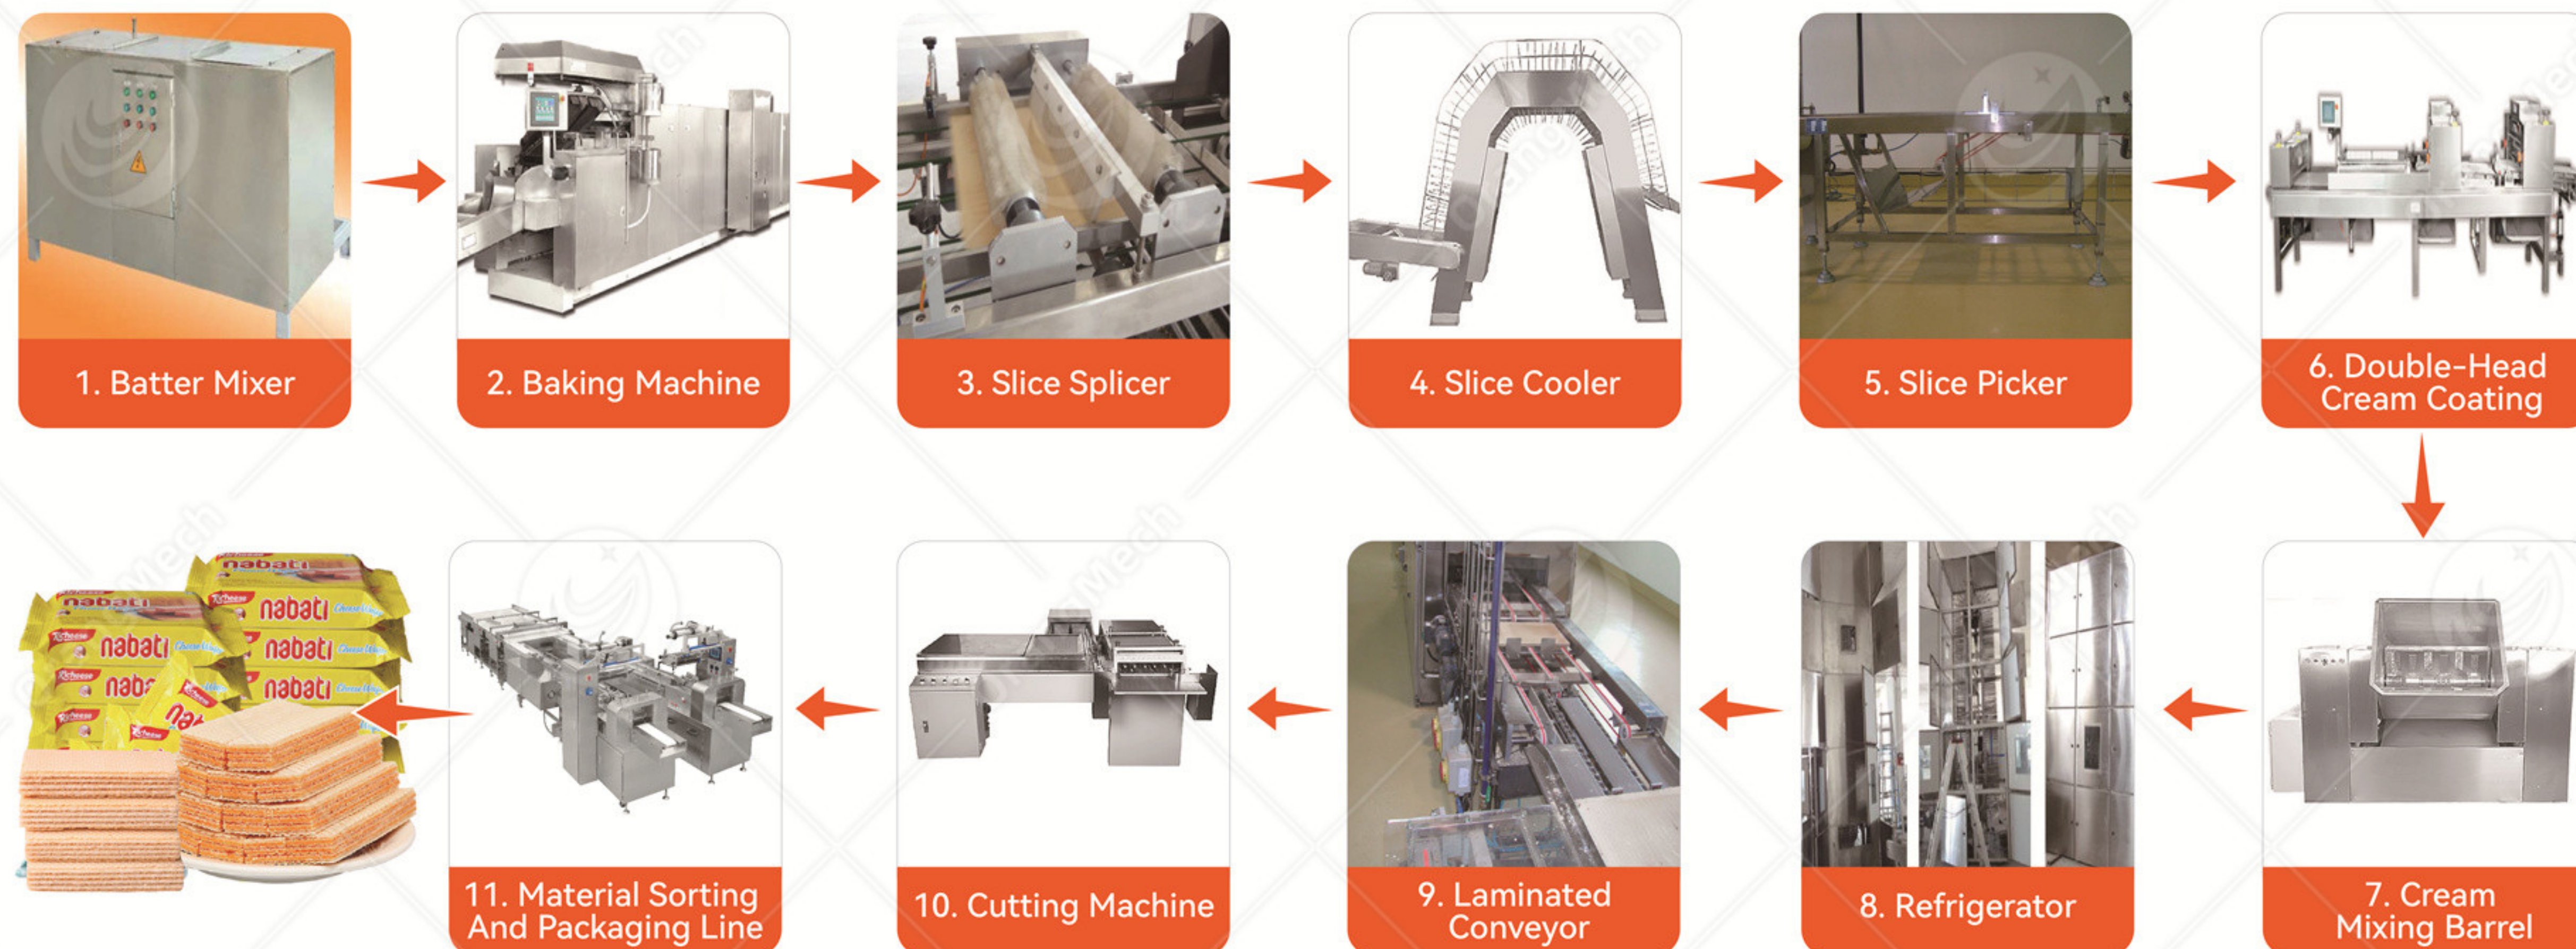

Model	OR-PFL-150		OR-PFL-260	OR-PFL-600
Capacity	100-150kg/h		200-260kg/h	500-600kg/h
Total Power	74kw		105kw	205kw

* We Can Customize The Voltage & Product According To Your Requirement.

Wafer Processing Line

The wafer processing production line is a fully automatic production line customized by our company according to customer requirements, which covers the entire process from raw material processing to finished product packaging.

The wafer processing production line has the advantages of high degree of automation, efficient production, stable quality, and diversified production.

Model	Production capacity	Total Power
OR-WPL-500	500 pcs/min	75KW

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Mochi / Kubba/Moon Cake / Pie Production Line

The mooncake/pie production line is mainly used to produce multi-layer line pies, wife cakes, mooncakes, Mochi, Maamoul, Kubba, Kibbeh, small falafel, coxinha etc. The production line has a high degree of automation and saves manpower. The internal and external structure and appearance of the product can be customized according to customer needs.

1 Dough Mixer

2 Encrusting Machine

4 Tray Arranging Machine

3 Forming Machine

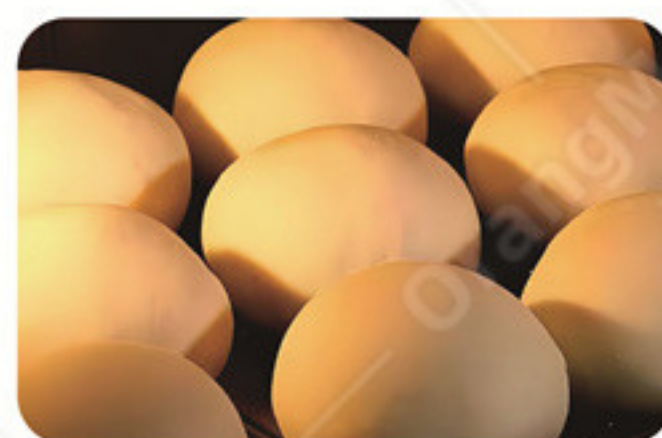

Model	Production capacity	Total Power
OR-MCPL-120	120 pcs/min	12KW

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Hamburg Production Line

This set of equipment is a hamburger production line independently developed and produced by our company. The production capacity of this production line is 1000pcs/h, 2000pcs/h, and 3000pcs/h respectively. This production line can reduce manual operations, increase production speed, and ensure the stability of product quality.

1. Automatic turn-over dough mixer

2. Dough dividing and rounding machine

3. Proofing room

4. Rotary oven

Model	OR-HB-2000	OR-HB-6000	OR-HB-10000
Capacity	2000pcs/h	6000pcs/h	10000pcs/h
Total Power	45KW	69.5KW	100KW

* We Can Customize The Voltage & Product According To Your Requirement.

Egg Cake Processing Production line

The egg processing production line is an egg deep processing equipment . The whole set of equipment includes soaking, feeding, hair roller cleaning, air drying, egg white and egg liquid separation, stirring, cake pouring machine, etc. The whole set equipment including egg washing machine, egg white and egg yolk separating machine, cake mixer machine, cake filling machine and cake baking oven.

Model	OR-ECL-180	OR-ECL-260
Capacity	120-180kg/h	200-260kg/h
Total Power	12.5KW	13KW

* We Can Customize The Voltage & Product According To Your Requirement.

Jelly Production Line

The jelly production line is a set of automated equipment specially used for producing jelly, covering the whole process from raw material processing to finished product packaging. The production capacity of this production line is 500kg/h, 1000kg/h, 2000kg/h, and 5000kg/h. This set of equipment has the following advantages: automated control, high production efficiency; can adapt to a variety of jelly formula processing; simple machine operation; easy to clean and disinfect, to ensure food safety.

Model	OR-JPL-500	OR-JPL-1000	OR-JPL-2000
Capacity	500kg/h	1000kg/h	2000kg/h
Total Power	154.7KW	160KW	190KW

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Juice Processing Line

The large-scale juice production line is a juice production equipment independently produced by our company. The whole set of equipment includes fruit selection and sorting, cleaning, peeling and core removal, juicing, disinfection and sterilization, filling, etc.

This set of equipment has high production efficiency; simple installation and convenient operation; the product is multifunctional and can adapt to the processing of various fruits and produce different types of juice; the automated control system can produce continuously and the product quality is stable.

Model	OR-JPL-300	OR-JPL-500	OR-JPL-1000
Capacity	500kg/h	1000kg/h	2000kg/h
Total Power	30KW	35.2KW	44.5KW

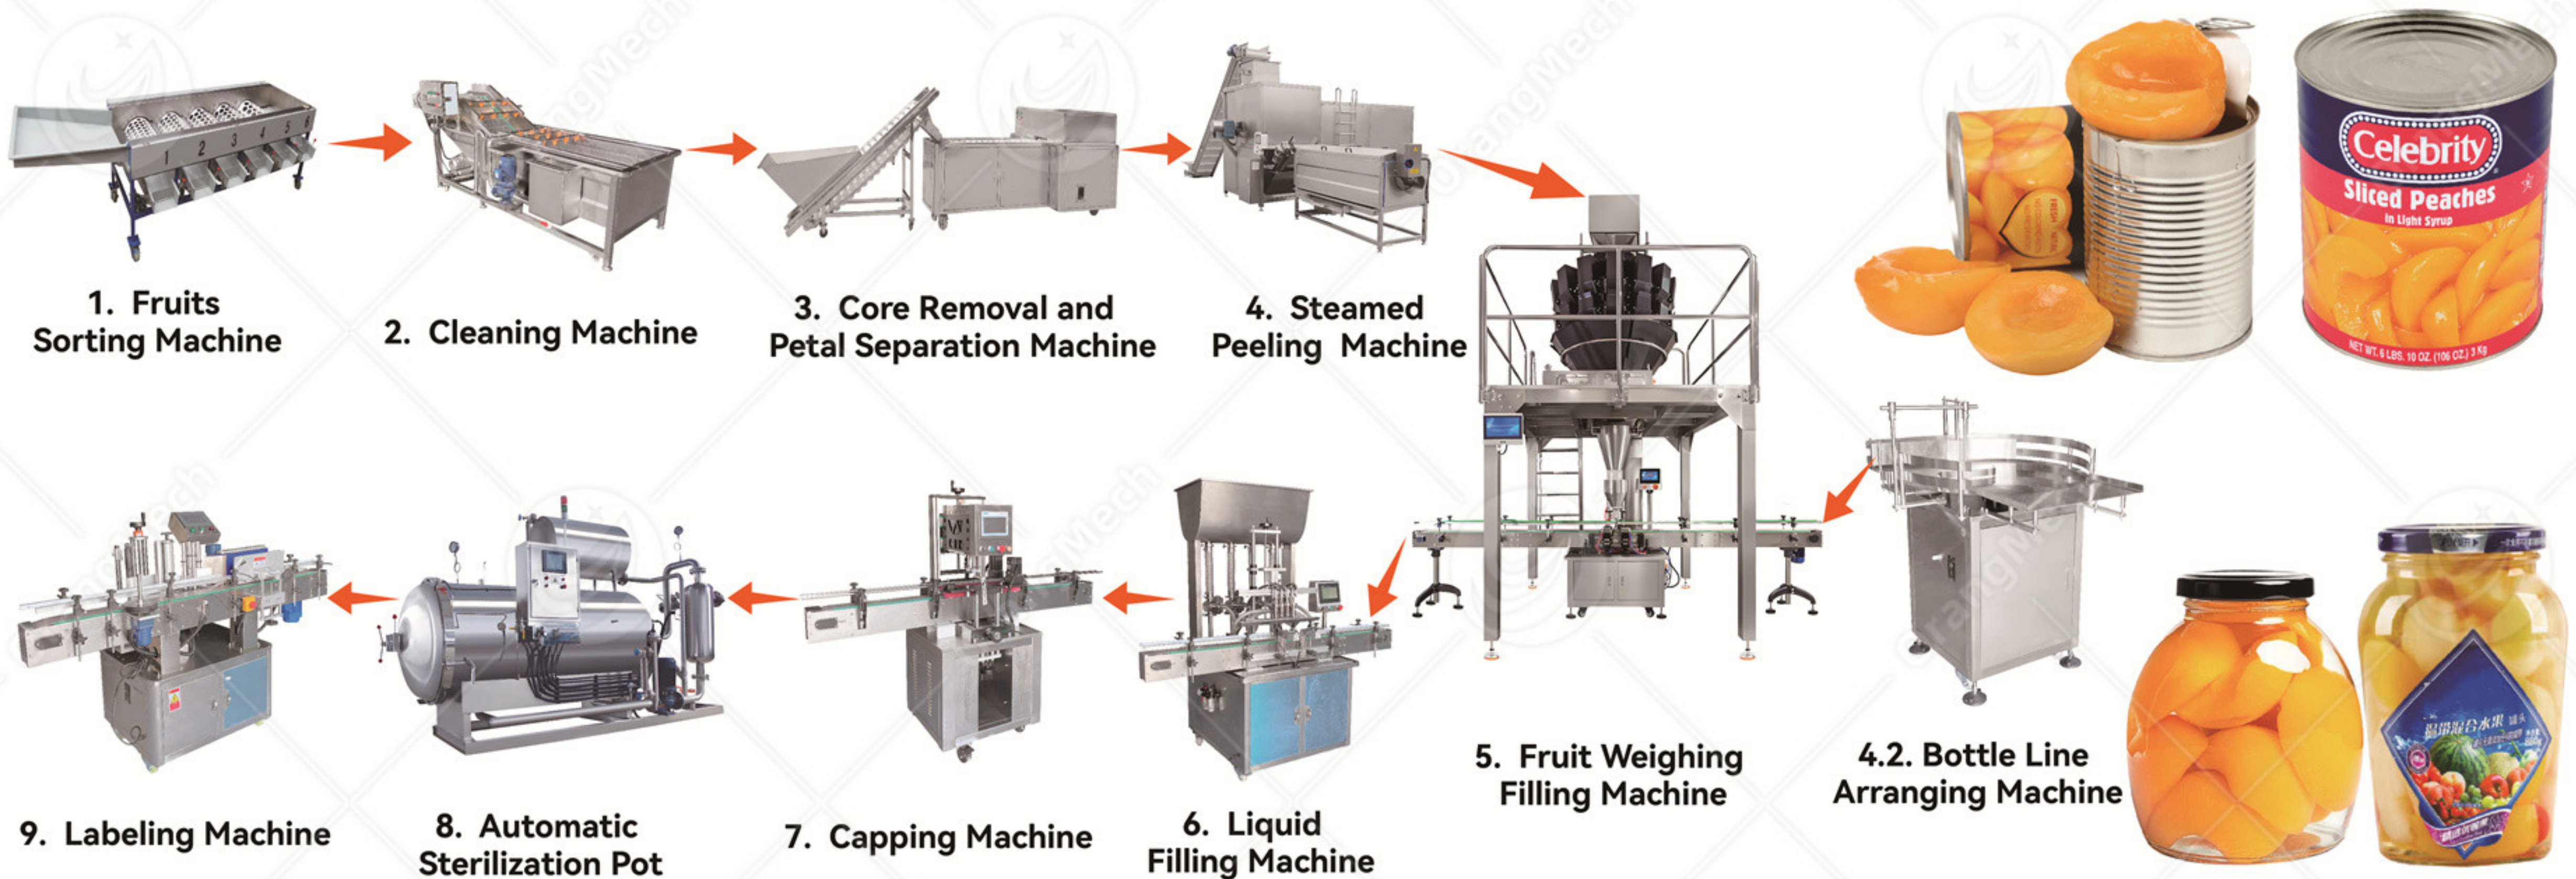

* We Can Customize The Voltage & Product According To Your Requirement.

Canned Fruit Production line

This canned fruit production line is carefully developed and produced by our company.

The whole set of equipment includes a series of processes such as fruit selection and sorting, cleaning, core removal and separation, peeling, filling, sterilization, etc. Its production capacity is 500kg/h, 800kg/h, and 1000kg/h respectively.

This set of equipment can adapt to the processing of various fruits and produce different types of canned fruits.

Model	OR-CFL-500		OR-CFL-800	OR-CFL-1000
Capacity	500kg/h		800kg/h	1000kg/h
Total Power	50KW		80KW	120KW

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Mineral Water Production Line

Mineral water production line is to process raw water through multiple processes such as filtration, disinfection and sterilization, fill the water that meets the standards into bottles and seal them.

This equipment has high automation, high production efficiency, high metering accuracy and simple operation, and is an ideal equipment for small and medium-sized factories.

1 Water Purifier

2 Canning Machine

3 Capping Machine

4 Labeling Machine

Model	OR-MWL-3000	OR-MWL-10000	OR-MWL-20000
Capacity (500ml/BPH)	2000	8000-10000	18000-20000
Total Power	5KW	11KW	15KW

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Beer Production Line

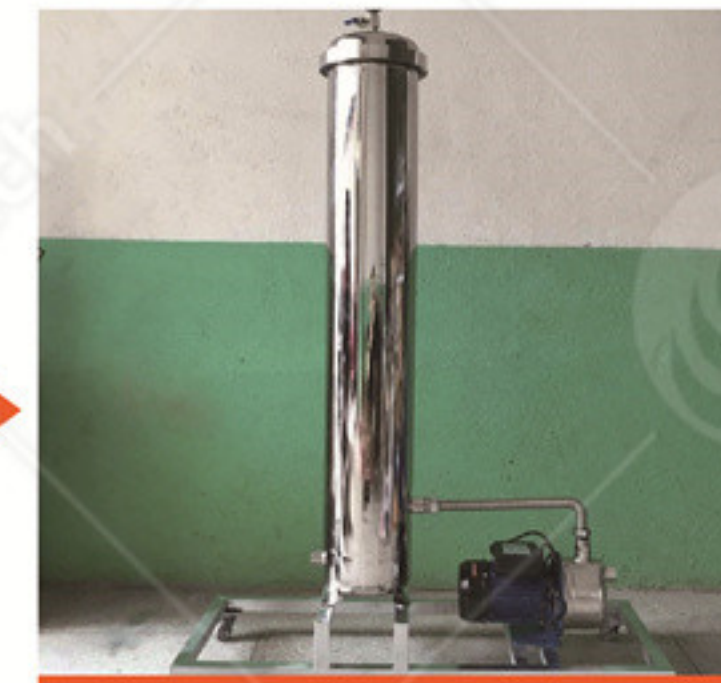

The beer production line adopts German fresh beer processing and production technology. Its process flow is mainly divided into saccharification, filtration, boiling, cooling and fermentation. The raw materials are high-quality malt, rice and hops, and are brewed with spring water or purified water.

1. Malt Crushing Machine

2. Saccharification Tank

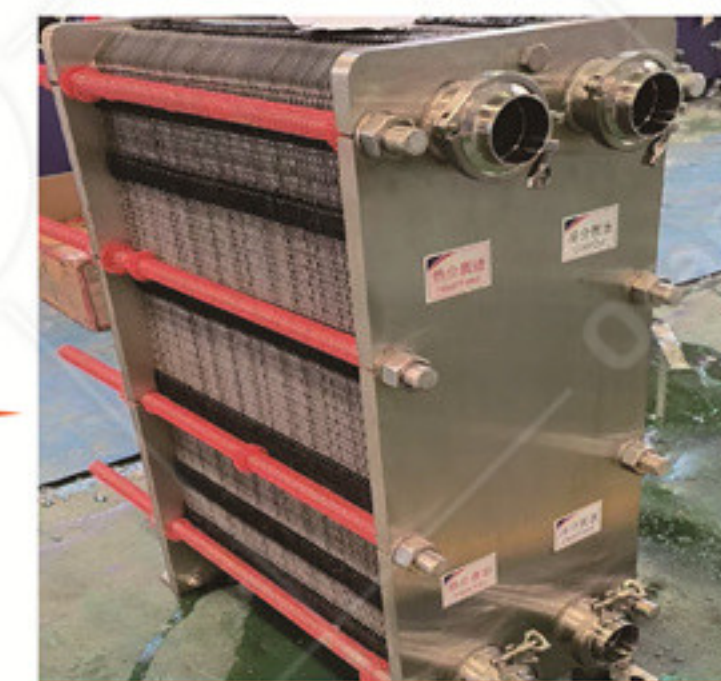

3. Filter

4. Cooking Tank

5. Sedimentation Tank

6. Plate Heat Exchanger

7. Fermentation Tank

8. Filter

Model	OR-BPL-1000		OR-BPL-2000
Capacity	1000kg/time		2000kg/h
Total Power	65.75KW		

* We Can Customize The Voltage & Product According To Your Requirement.

Nuts Processing Production Line

The nut processing production line is a set of comprehensive equipment specially used to convert nut raw materials into marketable finished nuts. It covers a series of processes from nut screening, cleaning, baking, seasoning to packaging.

This set of equipment adopts automatic control, which greatly shortens the processing time and improves production efficiency; accurately controls the parameters of each link to ensure the stability of the quality of nuts; and reduces labor intensity and labor costs.

Model	OR-NPL-500	OR-NPL-1000
Capacity	400-500Kg/h	900-1000Kg/h
Power	149.1KW	177.3KW

* We Can Customize The Voltage & Product According To Your Requirement.

Sausage Filling Production Line

The complete set of sausage processing equipment consists of multiple pieces of equipment, including meat grinders, sausage mixers, meat cutters, hydraulic sausage machines, smokers, vacuum packaging machines, etc. These devices can realize automated operations, thereby improving production efficiency and reducing labor costs.

1 Meat Grinder

2 Meat Bowl Cutter

3 Vacuum Stuffing Machine

4 Vacuum Sausage Stuffer

7 Vacuum Packing Machine

6 Smoke Oven

5 High Speed Kink Machine

Model	OR-SFL-80	OR-SFL-150	OR-SFL-500
Capacity	50-80Kg/h	100-150Kg/h	300-500Kg/h
Total Power	41.3KW	60.25KW	77KW

* We Can Customize The Voltage & Product According To Your Requirement.

Canned Meat Production Line

The canned meat production line is a canned food production equipment independently produced by our company. The whole set of equipment includes a series of processes from raw material processing to filling. This set of equipment has the advantages of high production efficiency, adaptability to the processing of various meat foods, simple operation and easy installation, and stable product quality. The production capacities of the production line are 100kg/h, 300kg/h, 500kg/h and 1000kg/h respectively.

Model	OR-CML-500	OR-CML-1000
Capacity	500kg/h	1000kg/h
Total Power	48.6KW	64KW

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Peanut Butter Processing Line

The peanut butter processing line is a series of equipment specially used to process peanuts into butter. The whole set of equipment includes feeding, peanut roasting, peeling, grinding, mixing, filling, etc.

This set of equipment can convert a large amount of peanut raw materials into peanut butter with high production efficiency; the equipment is easy to clean and disinfect, safe and hygienic; the formula and process can be adjusted to produce peanut butter of different flavors; it is simple to operate and easy to install.

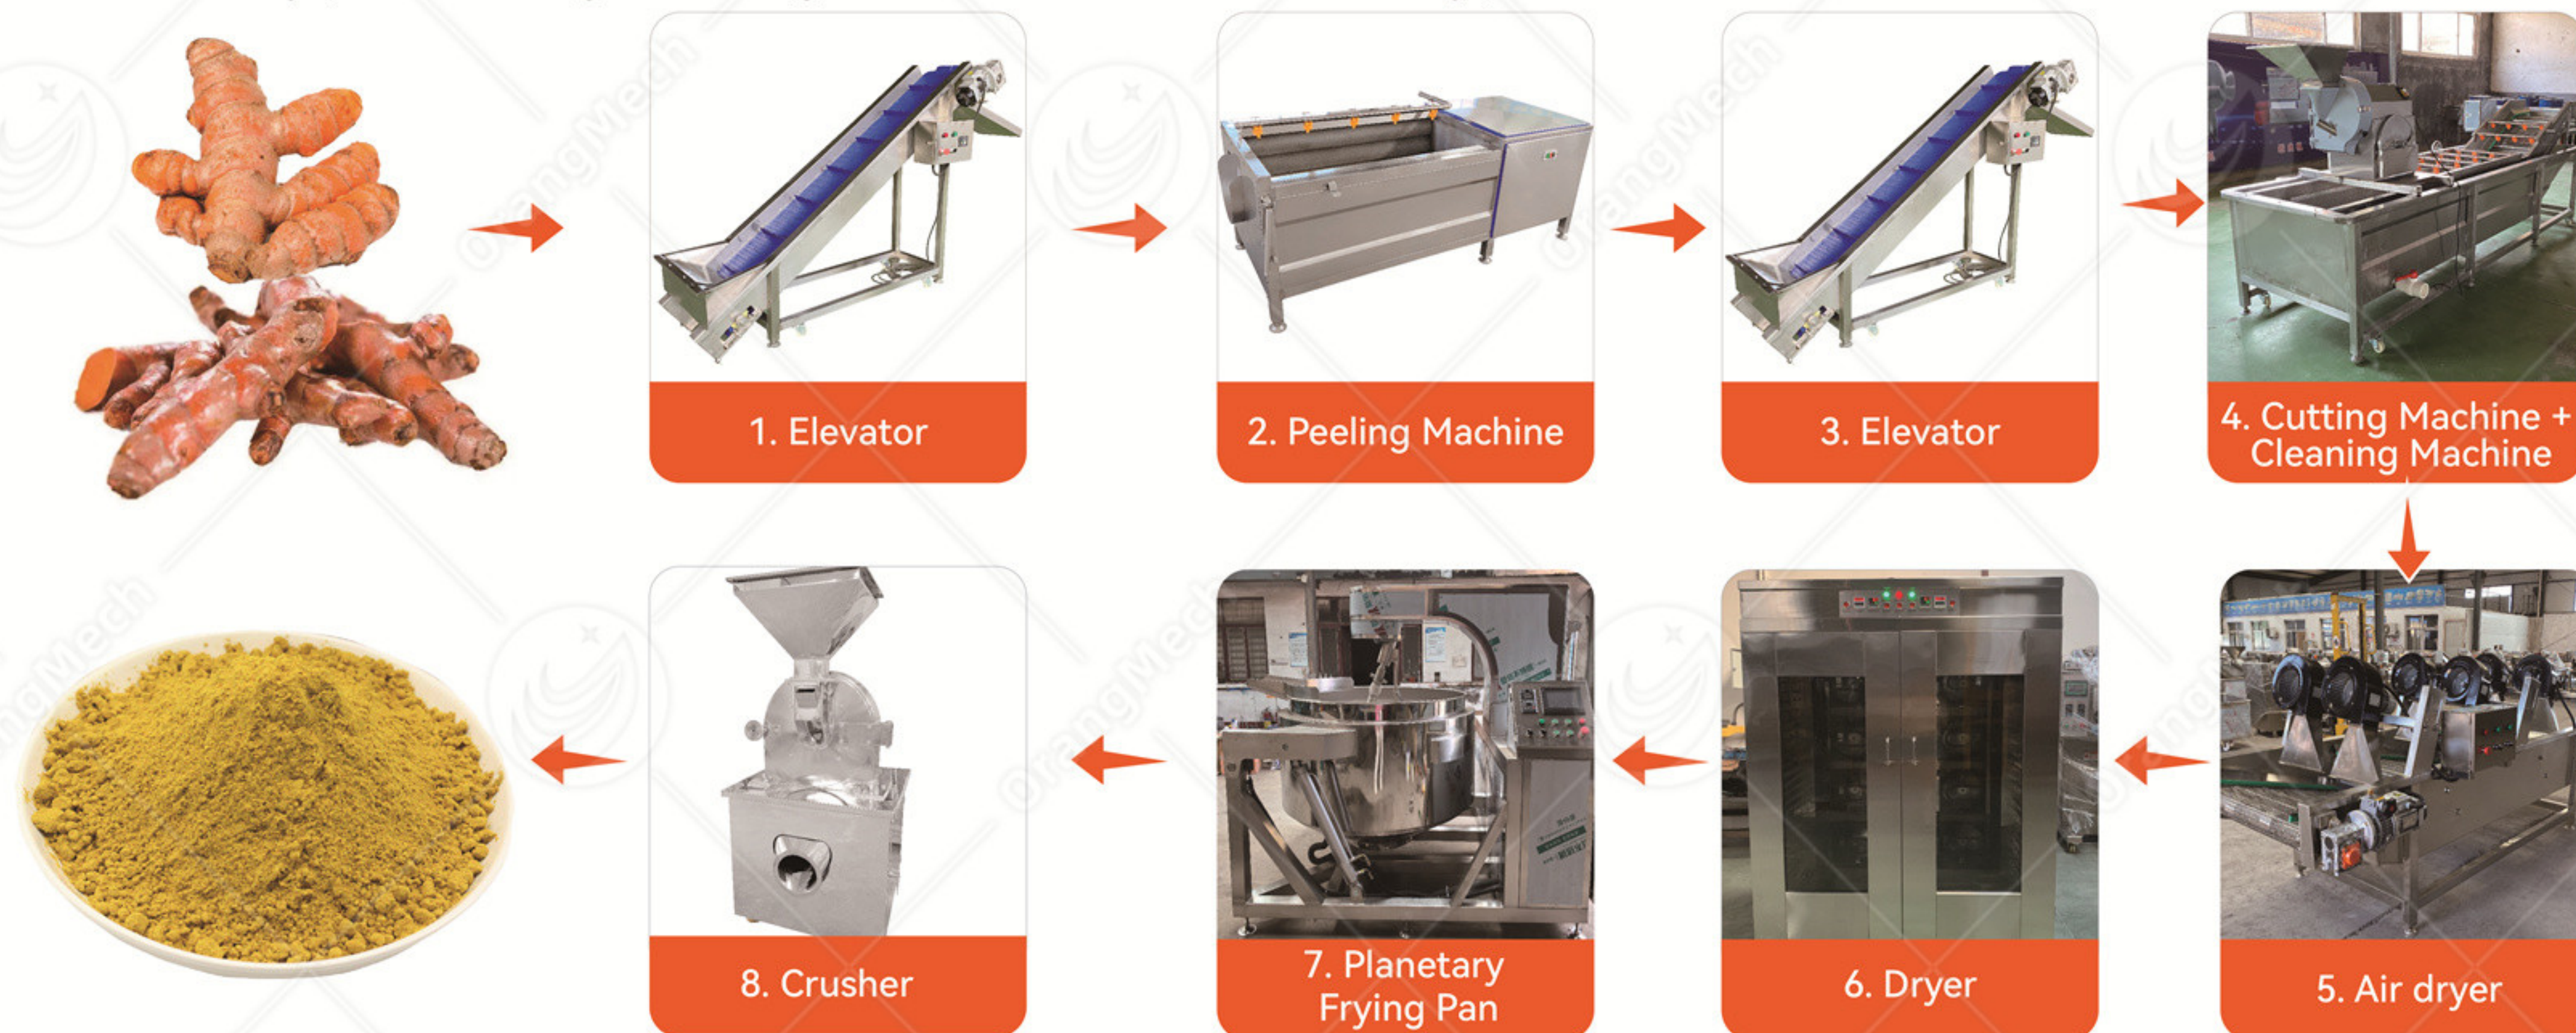

Model	OR-PBL-300		OR-PBL-500
Capacity	300Kg/h		500Kg/h
Power	148.85KW		199.6KW

* We Can Customize The Voltage & Product According To Your Requirement.

Curry Powder Processing Production Line

The curry powder production line is to lift the raw materials to the bubble cleaning belt cutting machine through the elevator, cut and clean, and then use the air dryer to dehydrate most of the water in the material, and then enter the dryer to dry thoroughly. After thorough drying, the raw materials are placed in the electromagnetic cooker for stirring and maturing (other auxiliary materials can be added during this period), and finally put into the grinder to grind to obtain the finished curry powder.

Model	OR-CPL-150		OR-CPL-300
Capacity	150kg/h		300kg/h
Power	158.25KW		

* We Can Customize The Voltage & Product According To Your Requirement.

Ginger Powder Production Line

The ginger powder processing line is used to process ginger into ginger powder, covering processes such as cleaning, peeling, slicing, drying, crushing, and packaging.

The equipment can quickly process a large amount of ginger and achieve large-scale production. Its production capacity is 300kg/h, and 1000kg/h respectively.

Standard process flow and parameter control ensure the quality of ginger powder. After ginger is processed into ginger powder, it is easy to store and transport, extending the shelf life.

1. Feeding Cleaning Machine

2. Peeling Machine

3. Slicing Machine

4. Air Cooling Machine

5. Dryer Machine

6. Universal Grinder

7. Powder Packing Machine

Model	OR-GPL-300	OR-GPL-1000
Capacity	300kg/h	1000kg/h
Total Power	26.5KW	45KW

* We Can Customize The Voltage & Product According To Your Requirement.

Professional manufacturer of food processing equipment

Tapioca Starch Production Line

This set of equipment is a tapioca starch production line independently developed and produced by our company. The production capacities of the production line are 1500kg/h, 2000kg/h and 3000kg/h respectively. This production line is used for the extraction and processing of potato starch such as sweet potatoes, potatoes, and cassava. Suitable production equipment can be customized according to the user's production process and production capacity requirements.

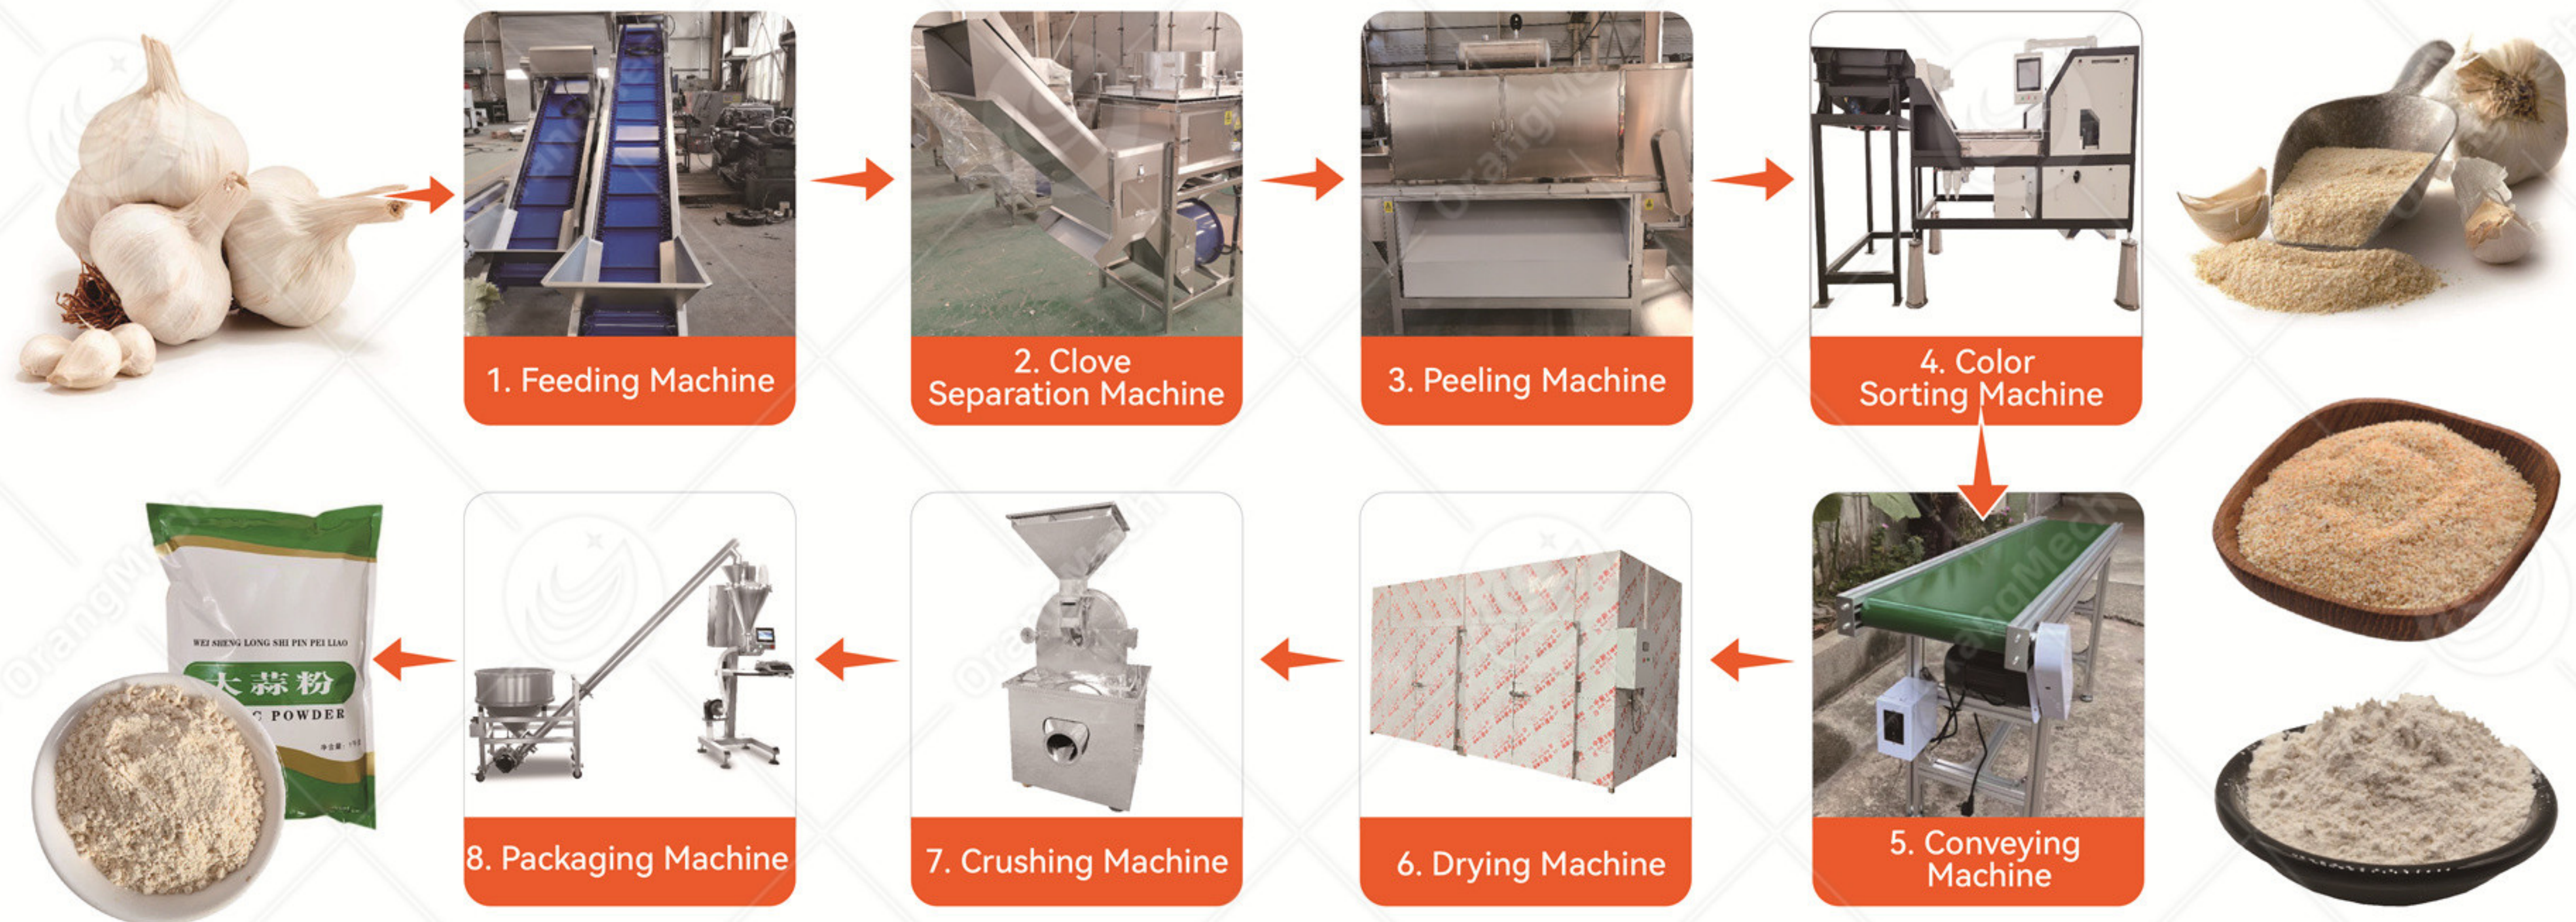

Model	OR-TSL-1500	OR-TSL-2000	OR-TSL-3000
Capacity	1500kg/h	2000kg/h	3000kg/h
Total Power	80KW	112KW	160KW

* We Can Customize The Voltage & Product According To Your Requirement.

Garlic Powder Production Line

The garlic powder production line is a garlic powder production equipment independently developed by our company. The whole set of equipment includes feeding, clove separation, peeling, sorting, conveying, drying, crushing, packaging, etc.

This set of equipment is controlled by an automated system and has high production capacity. It runs stably and has guaranteed quality; it is easy to operate and saves labor costs, making it the first choice for large, medium and small enterprises.

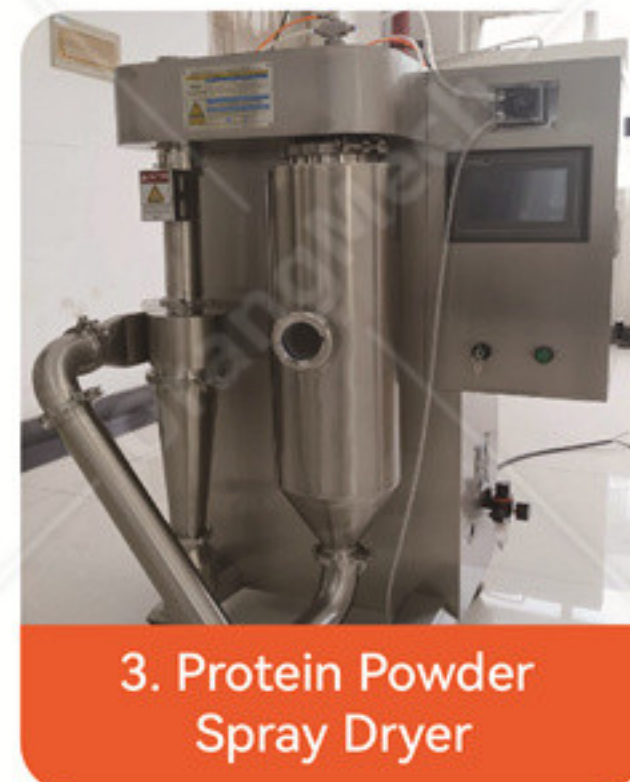

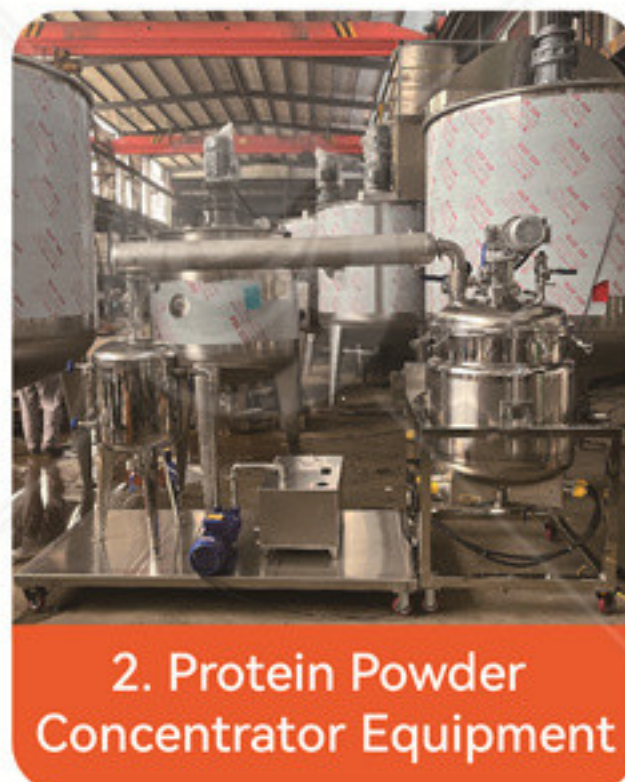

Model	OR-GPL-300	OR-GPL-5000	OR-GPL-1000
Capacity	300kg/h	500kg/h	1000kg/h
Total Power	35.2 KW	54KW	135.7KW

* We Can Customize The Voltage & Product According To Your Requirement.

Protein Powder Production Line

A protein powder production line is a series of equipment used to convert protein raw materials into finished protein powder products. The whole set of equipment includes lifting and crushing, mixing and extraction, spray drying, screening, mixing, packaging, etc.

The equipment is automatically controlled to improve production speed and efficiency; Stable operation, saving labor; Strong flexibility, according to market demand, different types of protein powder products, different formulations; High utilization rate of raw materials, by optimizing the production process, making full use of the protein components in the raw materials, reducing waste and reducing costs.

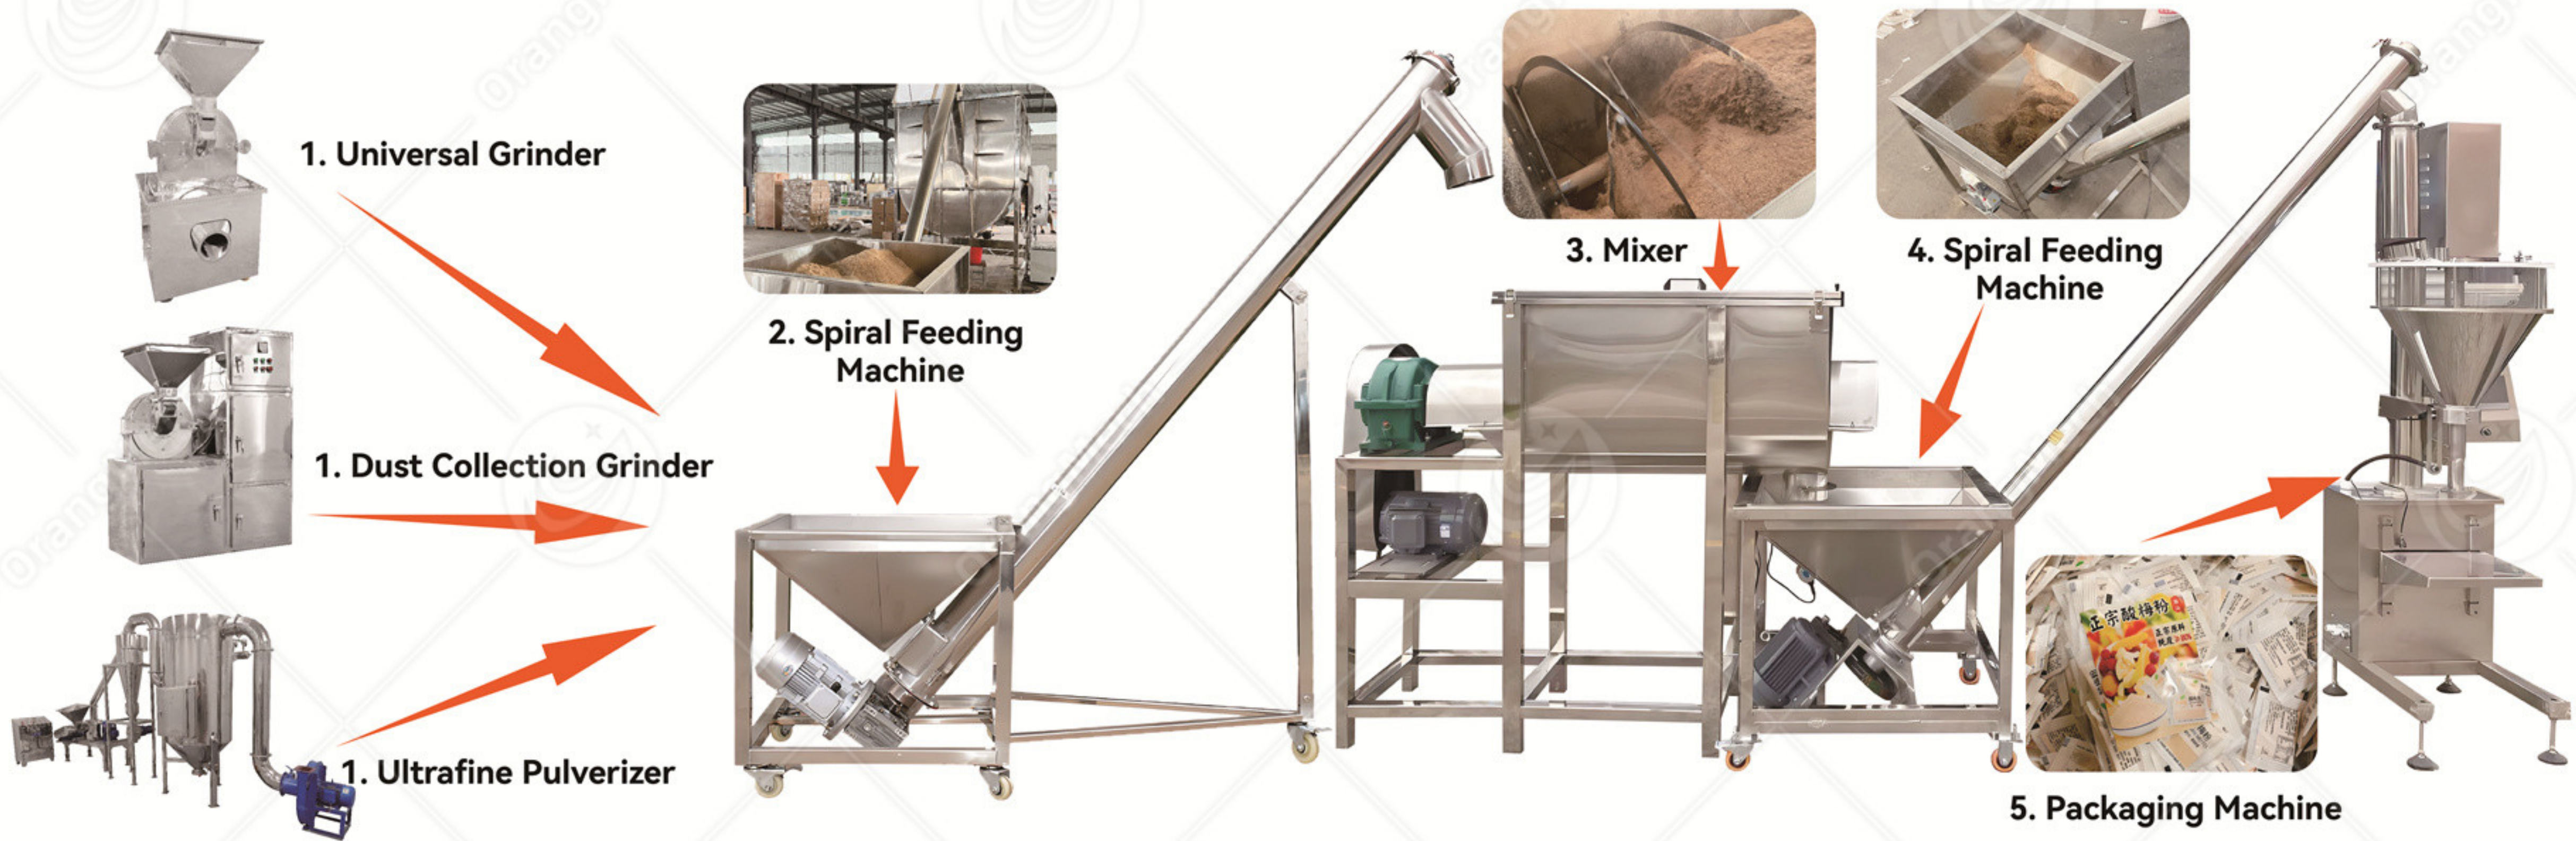

Model	OR-PPL-80	OR-PPL-200	OR-PPL-300
Capacity	50-80Kg/h	150-200Kg/h	220-300Kg/h
Power	49.5KW	136.5KW	168.5KW

* We Can Customize The Voltage & Product According To Your Requirement.

Powder Production Line

This set of equipment is a powder and granular material mixing and packaging production line. The equipment has a production capacity of 100kg/h, 300kg/h, 500kg/h, and 1000kg/h. It is designed according to the customer's process requirements. The equipment can be designed with heating, spraying, weighing and other functions according to demand. It is widely used in food, chemical, pharmaceutical, agricultural and sideline products and other fields, with the advantages of simple operation, high efficiency, large output, easy installation and easy cleaning.

Model	OR-PPL100	OR-PPL500	OR-PPL1000	OR-PPL2000
Standard Output	100Kg/h	500Kg/h	1000Kg/h	2000Kg/h
Total Power	10.5KW	12KW	17KW	20KW

* We Can Customize The Voltage & Product According To Your Requirement.

Onion Processing Production Line

The onion processing production line is a set of production equipment specially used for various processing of onions. It covers a series of processes from onion transportation, peeling, cleaning, dicing to packaging.

This set of equipment can quickly process a large number of onions, improve production efficiency, and save labor costs; precise cutting and processing methods can maximize the use of onion raw materials and reduce raw material waste; the production line can be flexibly adjusted to produce onion products of different specifications and forms.

1. Lifting machine

2. Peeling machine

3. Cleaning machine

4. Air drying machine

5. Dicing machine

6. Packaging machine

Model	OR-OPL-300		OR-OPL-800
Capacity	300Kg/h		800Kg/h
Power	25.8KW		60KW

* We Can Customize The Voltage & Product According To Your Requirement.
